

## Customer Testimonies

**Mary Davis, Director**

**Childcare Resource Network**

*"We are currently using the HOCL product in our four daycare centers to disinfect. We spray the building every morning before children arrive, each classroom during the day when the children are outside and each evening after closing. Our teachers feel better about their rooms and we feel it has helped with keeping our children and staff safer."*

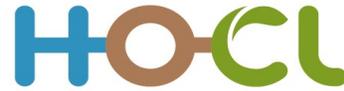

**Kerry Mitchell**

**Owner of Boaz Chevrolet**

*"I think of our employees and customers as family and want them to be safe when they are here."*

### These are a few places using our products:

Bethsaida Baptist Church, Boaz  
DeKalb Technical School  
Clanton First Assembly  
Alatrade Foods, Albertville  
Christ Central Church  
Floyd Medical Ambulances, Rome, GA

Chevrolet of Boaz  
Starlight Daycare, Mobile  
Four Fort Payne Daycares  
Mt. Zion B.C., Springville  
United Cerebral Palsy, Huntsville  
And so many more

AgriClean has been using HOCL (hypochlorous acid) in the agriculture business for many years. HOCL has been very productive in hatcheries resulting in excellent sanitation reports. AgriClean has expanded sales of this product to many other businesses, churches, daycares, medical centers, funeral homes, schools and more. HOCL is:

- Proficient at killing bacteria, viruses and fungal growth
- Safe enough to disinfect personal items for a baby.
- 80 times more effective than bleach and won't harm fabrics
- 100% safe for humans and animals
- All natural and non-toxic. HOCL is a powerful germ killer yet it is a non-irritant to the eyes and skin.
- Naturally produced in our white blood cells to help fight infection

### CASPR (Continuous Air Surface Pathogen Reduction)

AgriClean is proud to introduce hospital and industrial-grade products. Whether you're looking to add an extra layer of protection to your home or place of business, we have a solution for you. Our two primary solutions are the in-duct units, which are installed in your HVAC, and our Mobile unit which simply plugs into any wall outlet!

CASPR In Duct Unit

Like our healthcare solutions, these devices are easily installed, require no operator or chemicals, run continuously, and require minimum maintenance every few years. Our products are 99.96% effective against bacteria, viruses, molds, and even reduce VOCs and odors.

### CASPR Mobile Units

CASPR Mobile is our plug and play solution. Once you plug into your wall outlet and turn it on, it is ready for continuous 24/7 use. The device comes in one size but has adjustable settings to cover as few as 250 square feet and up to 1,500 square feet. A remote control is included to allow for easy adjustments to your unit.

We named this unit Mobile because it is not permanently installed. You can move it with you if you ever leave your space. This product is ideal for dental offices, dorm rooms, smaller spaces (under 1,500 square feet), or rented/leased spaces. A combination of CASPR Mobile devices can be used to cover greater than 1,500 square feet.

CASPR Compact

CASPR Compact+

### CASPR Siren for Emergency Vehicles

CASPR siren is designed to be a permanently mounted unit, specifically for Police, Emergency Medical, Fire, and Rescue vehicle applications. CASPR renders bacteria, viruses, mold, mildew and other contaminants in the air and on surfaces. It is effective and harmless on a continual basis.

Treatment also eliminates odors and creates a cleaner, safer work environment for emergency service personnel and their patients.

CASPR Siren can be installed on the ceiling, a wall or even inside the vehicle ceiling.

### CASPR Transit for buses and trains

Coming Soon: CASPR Transit has been designed specifically for buses and trains, where odors can rapidly become a nuisance for users, and where bacteria and mold are hard to control. CASPR Transit will keep the air fresh and continuously decontaminate both the air and surfaces
