

SWING

THE
MECHANICAL SWITCH
COLLECTION

**HARMONY
HAS A NEW SHAPE**

Swing is the first series of rocker switches from the VDA Group that completes and expands the catalog of smart devices designed for the Hotel room.

The new series is available in black color, and offers the possibility of customizing the icons with the proposals available in the catalog. The icons feature extremely clear and legible laser machining, which are backlit in RGBW, and can be associated with specific colors depending on the functionality or mode chosen (e.g., for 'Night Light', 'Do Not Disturb' or 'Make-up Room' modes).

Like the entire range of VDA solutions, Swing was developed based on the People-centric Hospitality philosophy and finds its ultimate realization in the proximity function, which ensures high usability of the device even in the dark and enhances the guest experience during the Hotel stay.

Compatible with Micromaster, the platform that has dictated the rules of the Guest Room Management System, and with Etheos, the new cloud-based Room Management System. Swing is the ideal solution for those who do not want to give up GRMS while having a limited budget.

Easy installation, high customization, and low cost make Swing the ideal collection for the middle-scale segment Hotels.

OUTDOOR READER

OUTDOOR BACKLIGHT

THERMOSTAT

SMART SWITCH

The list of devices in the Swing collection – combined by obtaining dual plates - consists of:

Outdoor Reader

Out-of-door RFID key reader, which can also be configured as a simple room status indicator for Hotels that already have access control installed.

Outdoor Backlight

Decorative element that can be associated with the access reader with the function of backlighting the room number, the area of the facility, or simply the Hotel logo.

Thermostat

The Swing thermostat is the central element of the room and integrates with the occupancy sensor, preventing energy wastage when the guest leaves the room and forgets an RFID key in the internal card holder.

The thermostat interface reports essential controls and ensures optimal guest usage.

Smart Switch

Configurable smart switch from 1 to 6 buttons for managing lights, curtains, 'Privacy' mode, 'Make-up Room' mode, etc.
