## Welcome to Piyush Wire Industries

Piyush Wire Industries manufactures and supplies perimeter fencing made out of steel. That defines our core competency.

Piyush Wire Industries was founded by Mr. Narendra Vijay Gupta & Mr. Late Upendra Vijay Gupta in 1962 in a city of Jaipur, Rajasthan, INDIA which is now Successfully running by there sons Mr. Parag Gupta & Mr. Puneet Gupta .It is a setup, with High Technique chain link weaving machine & Barbed Wire Automatic Machine. On this foundation, Piyush Wire Industries has grown manifolds today, supplying complete suite of fencing products, all around India and Looking to Expand all around the world.

Piyush Wire Industries has developed itself into a one-stop shop for all fencing requirements. We manufacture starting from the fabric of the fence – whether it is chain link or welded mesh, to the posts required to support the fabric, to last nut and bolt required to install a fence system. We offer solutions for a wide variety of applications, whether it be political borders, oil and gas pipelines, prisons, corporate buildings, residential complexes, gardens, swimming pools, industrial zones, motorways, stadiums, schools etc.

We look forward to serve you the best.

### Our Products :

- Barbed Wire
- Chain Link Fence
- Welded Mesh
- Razor Wire
- Wire Netting
- Gabion Box & Wire Crates
- Hexagonal Wire Mesh
- Chicken Wire Mesh
- G.I & M.S Wire
- Crimped Wire Mesh
- Expanded Metal Mesh

### Our Achievements:

We are ISI,SSI,ISO & PGCIL Certified Company.

IS: 278

CM/L: 8400048815

# Barbed Wire

Piyush Wire Industries is the leading barbed wire manufacturer in India. **Barbed wire fencing** is perhaps one of the oldest forms of fencing, made out of steel wire. Even today, barbed wire is one of the most sought after fencing solution for farms, agricultural lands, residential apartments & commercial premises.

It is of great utility in topping high security fencing like Anti climb mesh, or by itself where, the intent is to keep away the cattle. Piyush Wire Industries manufactures barbed wire fence in various specifications. The most conventional is the double stranded line wire with the barbing wire (4 point Iowa type) at a certain pitch.

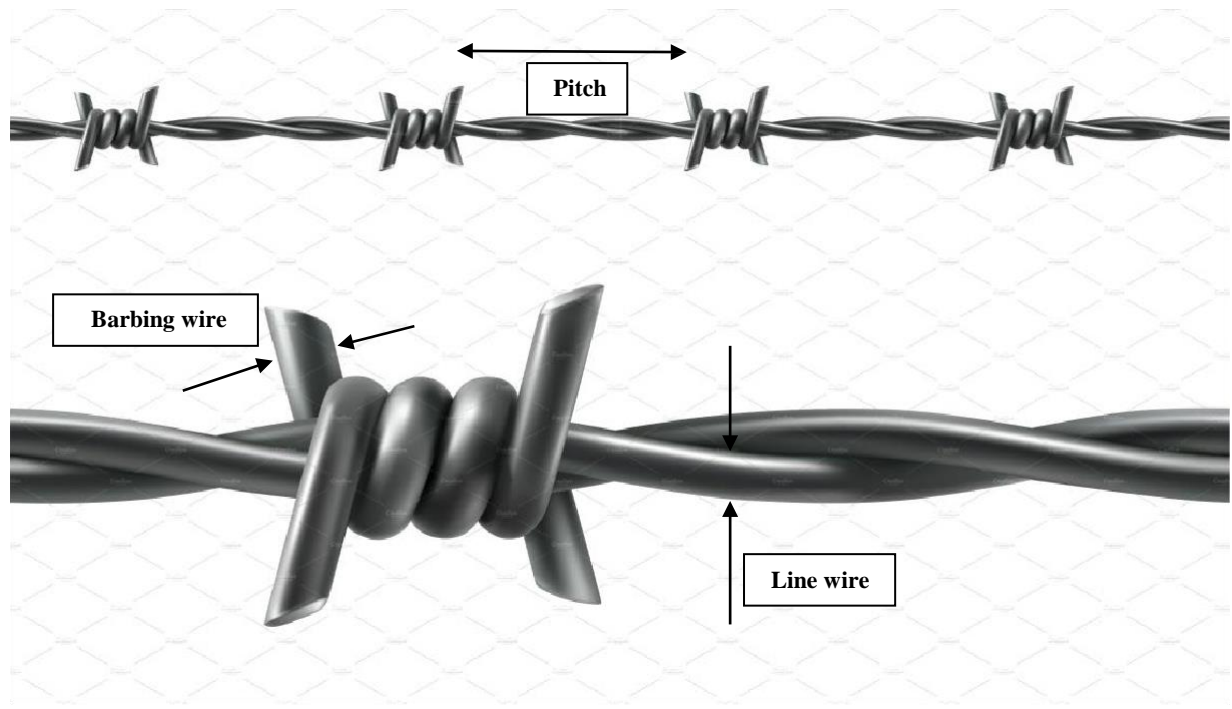

## Typical Barbed Wire Fence specifications:

<u>LINE WIRE</u>	<u>BARBING WIRE</u>	<u>PITCH</u>	<u>ZINC COATING</u>
2.50MM	2.50MM	75MM TO 150MM	<ul style="list-style-type: none"><li>➤ 15-30GSM ( VERY LIGHT COATED)</li><li>➤ 40-60GSM(COMMERCIAL)</li><li>➤ 90GSM(LIGHT COATED)</li><li>➤ 120GSM(MEDIUM COATED)</li><li>➤ 240GSM(HEAVY COATED)</li></ul>
2.30MM	2.30MM	75MM TO 150MM	
2.00MM	2.00MM	75MM TO 150MM	
2.30MM	2.00MM	75MM TO 150MM	
2.50MM	2.00MM	75MM TO 150MM	

*Zinc coating on Barbed wire can vary from very light grade (15-30gsm) to heavy grade (240 gsm).*

Piyush Wire Industries also manufactures PVC coated barbed wire, which further improves the life span of the product.

## Barbed Wire Diagram With its Measurements

# Chain Link Fence

Chain link fence is one of the most traditional and versatile form of wire fencing. It's a fence whose fabric is made out of woven wire forming a diamond (rhombus to be precise) shaped mesh. In different colours, it blends well with its surroundings.

## Chain Link Fence Applications:

It finds applications in wide variety of locations. In lighter gauge and bigger mesh sizes, it is used in residential and business areas – swimming pools, parks, gardens, residential building perimeter, demarcation in ware houses, schools, hospitals, etc.

In heavier gauge and smaller mesh sizes, it is often used in areas which require more protection against intentional intrusion, and it finds use in high security areas like – manufacturing units, military establishments, data centers, financial institutions, universities, railways, airports, motorways, oil and gas facilities, warehouse perimeter, chemical plants, etc.

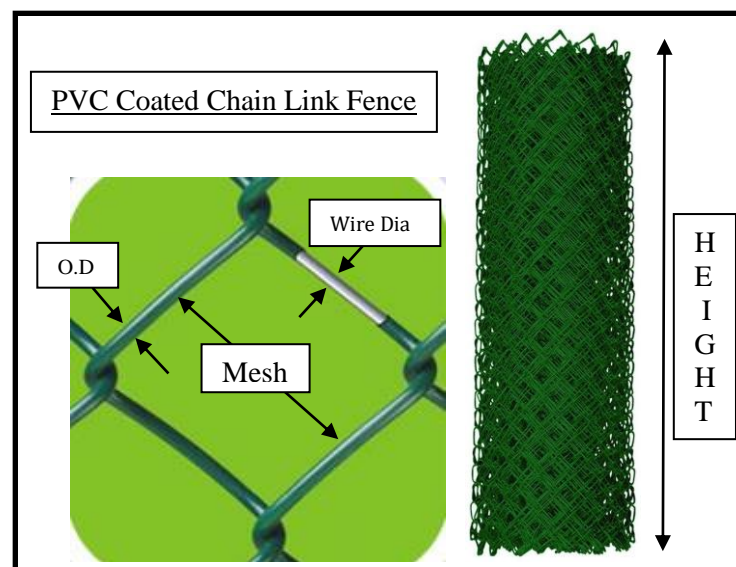

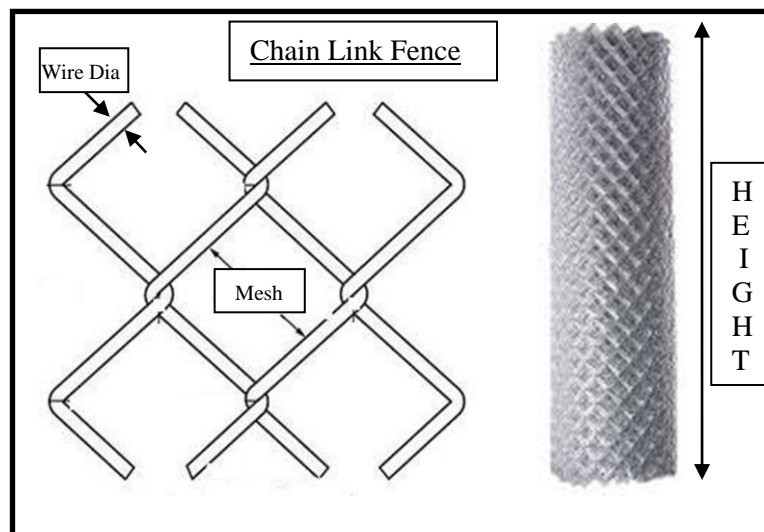

## Benefits & Features of Chain Link Fence:

The reason why chain link has stayed on as a viable solution for all these years is – the flexible fence fabric makes it easier for installation on ground with uneven terrain or steep slopes, and it's a cost efficient system.

## Chain Link Fence Specifications:

Piyush Wire Industries makes chain link fence in wide variety of specifications to tailor to customer needs.

- Wire diameter ranging from 1.6mm to 5mm.
- Mesh size varying from 25mm to 155mm.
- Zinc coating from 15gsm to 240gsm.
- Galvanized finish or PVC coated finish.
- Heights from 0.8mtrs to 5mtrs.
- Compacted or un-compacted rolls.

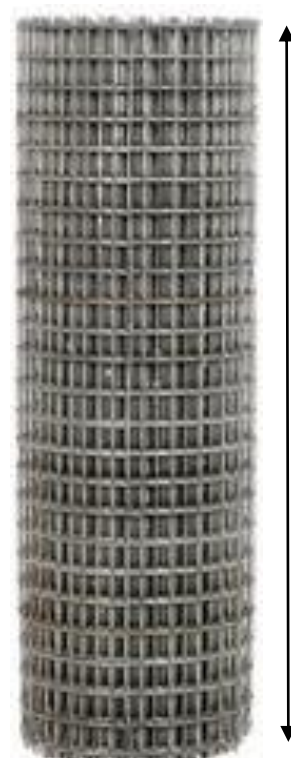

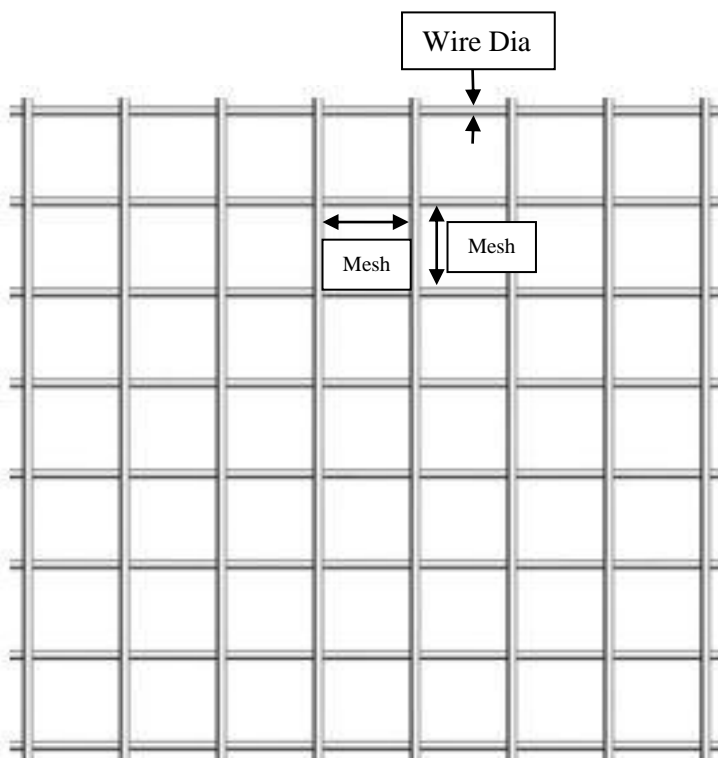

# Welded Mesh

Weld mesh is the term given to the kind of barrier fencing that is manufactured in square or rectangular mesh from steel wire, welded at each intersection. It is usually affixed to steel uprights. Weld mesh fence has an advantage over chain link fencing wire of not bending so easily and not being so easily cut. This mesh is ideal for high security sites, schools and industrial parks.

At Piyush Wire Industries , we have developed a complete in house ability to supply & manufacture a complete weld mesh fencing system – which would include supply of weld mesh fence panels, fabrication of posts, cover plates, cross bracings and horizontal supports, along with crank fabrication.

*Weld mesh panels* are often crimped to add more lateral strength to the panels, and it also adds to the aesthetic appeal of the fence.

## Welded Mesh

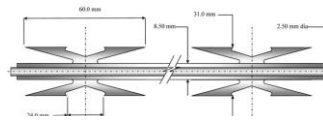

# Razor Wire

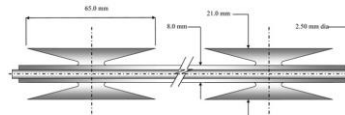

*Razor wire* is a central strand of high tensile wire, and a steel tape punched into a shape with barbs. The steel tape is cold crimped tightly to the wire. Razor wire is manufactured with a galvanized tape (Zinc coating ranging from 120 gsm to 275 gsm) and Galvanized core wire (diameter: 2.5mm) with zinc coating 90 gsm to 275 gsm). For more critical razor wire applications, stainless steel tape and stainless steel core wire is used.

## Types of Razor Wire

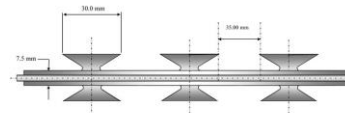

### ➤ Razor Wire Fish-hook Blade

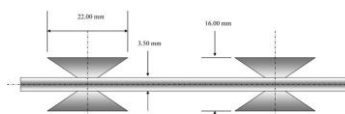

### ➤ Razor Wire Long Blade

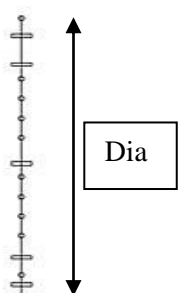

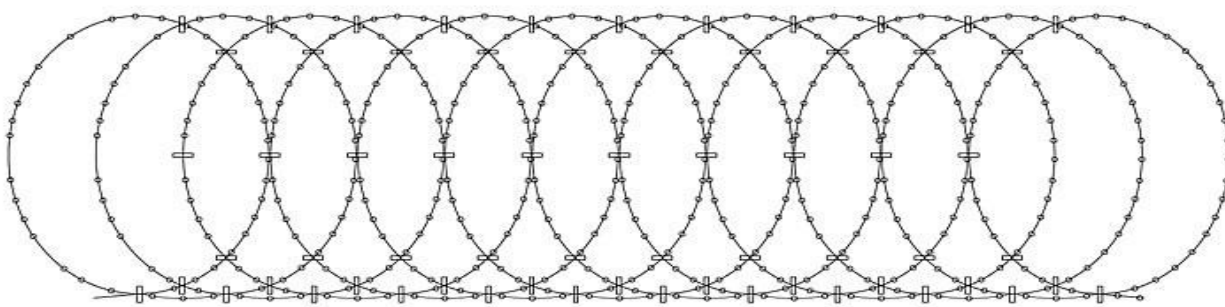

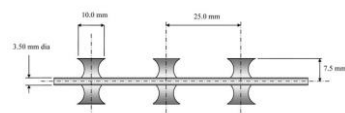

### ➤ Razor Wire Tear Blade

### ➤ Razor Wire Medium Blade

### ➤ Razor Wire Short Blade
