Dear Friend,

It was my honor to represent you and your family in Santa Fe during the recent Legislative session. I dedicated most of my efforts towards improving public safety, increasing access to quality healthcare, and eliminating government fraud, waste, and abuse. **I am proud to report some real progress, despite fierce opposition from Santa Fe progressive liberals.**

I helped pass medical malpractice reforms designed to stop trial lawyers from driving doctors out of our state. This was paired with efforts to bring more healthcare providers to underserved areas by cutting red tape and making it easier for qualified doctors to practice in rural New Mexico, where provider shortages really impact the health of our loved ones. This was a meaningful step in the right direction that took a lot of effort from Republicans over several years. I was glad to join the effort this year and do my part.

I supported **stronger penalties for criminals** who assault law enforcement officers and measures to give authorities more tools to intervene **when dangerous individuals** pose a risk to themselves or others. **Our communities deserve to feel safe**, and law enforcement officers deserve our full support.

Just as important as what passed is what we worked to stop. My Republican colleagues and I successfully **defeated extreme environmental mandates** that threatened jobs, increased energy costs, and hurt working families. We **pushed back against unconstitutional gun grab proposals** targeting law-abiding citizens instead of criminals. We opposed policies that would have made our communities less safe by weakening cooperation between law enforcement.

Despite **my fierce opposition**, another state budget passed that increases government spending fueled by burdensome new tax hikes. Spending has grown exponentially in recent years under this Governor, yet too many of our families struggle to make ends meet, crime remains sky-high, and education outcomes continue to lag. Throwing more money at problems with little to no accountability just doesn't work.

I made sure your voice was heard. We forced hard discussions on policies that deserved scrutiny, we built bipartisan coalitions when possible, and stood firm when it mattered most.

My commitment moving forward is simple: protect your freedoms, support law enforcement, strengthen rural healthcare, grow our economy, and be responsible with your tax dollars. **It is an honor to serve you and I thank you for the opportunity.**

Rex Wilson
Your State Senator, District 33
