

Bipolar Ionization Technology

Advanced Indoor Air Solutions

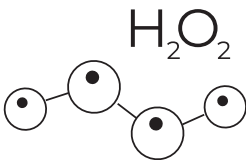

99.998% Effective in Neutralizing SARS-COV-2*

The Solution for Indoor Air

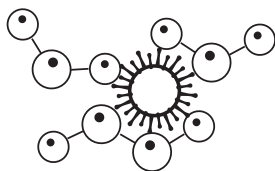

Bipolar Ionization Technology was tested in labs across the globe and was found effective in neutralizing a variety of viruses, bacteria, fungi, mold spores, and smoke.*

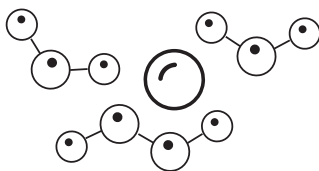

Patented bipolar ionization technology that generates O₂⁺ and O₂⁻ ions at high density

These O₂⁺ and O₂⁻ ions combine with moisture in the air (H₂O) to create H₂O₂, hydrogen peroxide

Once airborne, the hydrogen peroxide clusters around harmful pathogens both in the air and on surfaces

Upon contact, the hydrogen peroxide destroys the protective protein structure of the pathogens, rendering them harmless

Proven Technology Over

99%

Effective in neutralizing **SARS-COV-2** (Virus)*

Effective in neutralizing **H1N1 & H5N1** (Virus)*

Effective in neutralizing **Escherichia Coli** (Bacteria)*

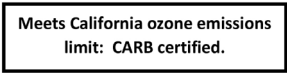

Effective in neutralizing **MRSA** (Bacteria)*

Patented Technology Benefits

- ✓ Proven to be effective in neutralizing pathogens*
- ✓ 10 billion to 1 trillion ions per second
- ✓ Undetectable levels of ozone**
- ✓ Easy to install
- ✓ 24/7 Self-Cleaning Units

Product Approval

Bipolar Ionization Technology has undergone many rigorous laboratory tests and has been approved by the most stringent regulatory bodies in the US, Israel and Europe.*

*In a lab setting **Based on UL test

Disclaimer - EXP ionization technology is not a medical device aimed to treat symptoms and/or cure any disease, including COVID-19 and/or any other medical condition.
