REGENTS HEALTH RESOURCES BRINGS HEALTHCARE INDUSTRY VETERANS SFERRELLA AND DEMONBREUN ABOARD TO DRIVE GROWTH STRATEGIES

NASHVILLE, Tennessee July 29, 2014 – Regents Health Resources, a consulting firm traditionally specializing in managing medical imaging services, has brought healthcare industry veteran Daryl Demonbreun and former St. Thomas executive Sheila Sferrella on board to help lead the company’s ambitious plans to grow into a full service healthcare consulting firm.

“Regents Health has been moving along at a steady pace for nearly 20 years, but it’s time to kick it up a notch,” says Bob Maier, founder and chief executive officer of Regents Health. “Daryl and Sheila have the expertise, savvy and just plain hustle necessary to guide the company into new areas of clinical and business development.”

Prior to joining Regents, Demonbreun co-piloted a consulting firm, Delta Health Care. In his new role, he’ll help CEO Maier drive business development and expand the company’s focus to medical practice consulting. Demonbreun has 30 years experience in healthcare, beginning as assistant practice administrator for a Nashville-based multi-specialty care group. Afterward, he was the director of physician services for Community Health Systems (CHS), an administrator of several single- and multi-specialty groups in the Nashville area, and vice president of Williamson County Medical Center in Franklin Tennessee. Demonbreun is also a regular speaker on health care issues.

Sferrella comes to Regents from Collaborative Consulting Solutions, a consultancy she founded working with group practices, academic medical centers and other healthcare operations to identify cost savings and other operational analysis capabilities. Sferrella will utilize her vast background in imaging, radiology and ambulatory services to expand the company’s footprint and service offerings.

Prior to Collaborative Consulting, she was the vice president of ambulatory services for St. Thomas Health in Nashville. She also held several executive administrative posts at various Pennsylvania and Maryland-based hospitals, including Lehigh Valley Health Network, where she was the administrator of diagnostic services.

About Regents Health Resources

Regents Health Resources, Inc. is a national consulting firm supporting operational and strategic requirements for healthcare providers in hospital system, independent practice and ambulatory service environments.
