

Horse Microchip Addendum

Recommended Option to Microchip Horse

Microchips insure ownership of your horse. Better than a brand, a microchip also identifies each individual horse as well as the owner’s information. Whether your horse is lost, stolen, or in the case of natural disaster, your horse can easily be identified.

Microchips are not all the same. Some are better than others! These meet official standards set by ISO and ICAR. A lifetime microchip serves the many needs of the horse and owner – throughout the life of the horse.

The Equine Protection Registry™

- Registration is for life or as long as you own your horse.
- Free web account and member card.
- Free nationwide ‘SearchAlerts‘
- No annual fees or hidden costs.

The cost to implant a microchip is \$30.00

At any time, your horse can be registered into The Equine Protection Registry at microchipIDequine.com (The current Online Lifetime Registration is \$22.95). We offer prepaid registration cards for \$20.00.

Election to Microchip

Buyer would like to have his/her horse microchipped for \$30.

Check here if Buyer would like a registry card for an additional \$20.

This page is considered and addendum to the horse purchase agreement dated _____ for the horse named _____.

Buyer(s) _____ Date _____

_____ Date _____

Note: These microchips are very high quality. All microchips are purchased from Microchip ID Systems. Endorsements/Certifications/Memberships above are for Microchip ID Systems and their microchips only. Implant procedure is based on the guidelines from the manufacturer/supplier and industry standards.
