HOW TO...

Measure For Screen Kneelers

Simply measure from one end support to the other from the insides of the supports. ①

Picture ② shows an Atwood-Hamlin Bracket mounted to the screen, while picture ③ shows an Atwood-Hamlin Bracket mounted to the floor. If the screens are too long for one kneeler, a center bracket is mounted creating two kneelers to fit the long screen. ④

Along with the measurements, please send photographs detailing these areas so that we can familiarize ourselves with your particular pews, and possible applications.
