Hot Stone-Smooth stones are heated and placed directly on the body. As the muscles warm up, they can be easily manipulated and massaged to sooth aches and pains.

Deep Tissue- Offers a massage technique to target the deepest layer of muscles in order to release knots and ease chronic muscle tension.

Relaxation- A smooth, gentle, flowing style that promotes general relaxation, relieves muscular tension, plus improves circulation and range of movement.

Therapeutic-Targets areas of discomfort in the body and provides relief to knots or tight bands of muscle fibers. Therapeutic massages are worth the temporary pain in order to gain the long-lasting benefits.

Sports- For any athlete, the massage is specific to your sport of choice, with focus on a particular troublesome area.

Prenatal- (must be after 1st trimester) Prenatal massage requires different techniques but provides the same wellness benefits to relieve stress and relax muscles.
