Agenda

- 3 PROBLEMS
- 4 PRODUCT
- 6 CLEANING STATS
- 7 COMPETITIVE ADVANTAGES
- 10 SERVICES
- 12 TEAM

Problem 1

Disease and Infection

Not cleaning your trash bins can lead to build up of unwanted bacteria and germs that can lead to disease and infection!

Problem 2

Stinky Smells and Animals

Dirty trash cans that attract animals, vermin, and insects and stink up the street.

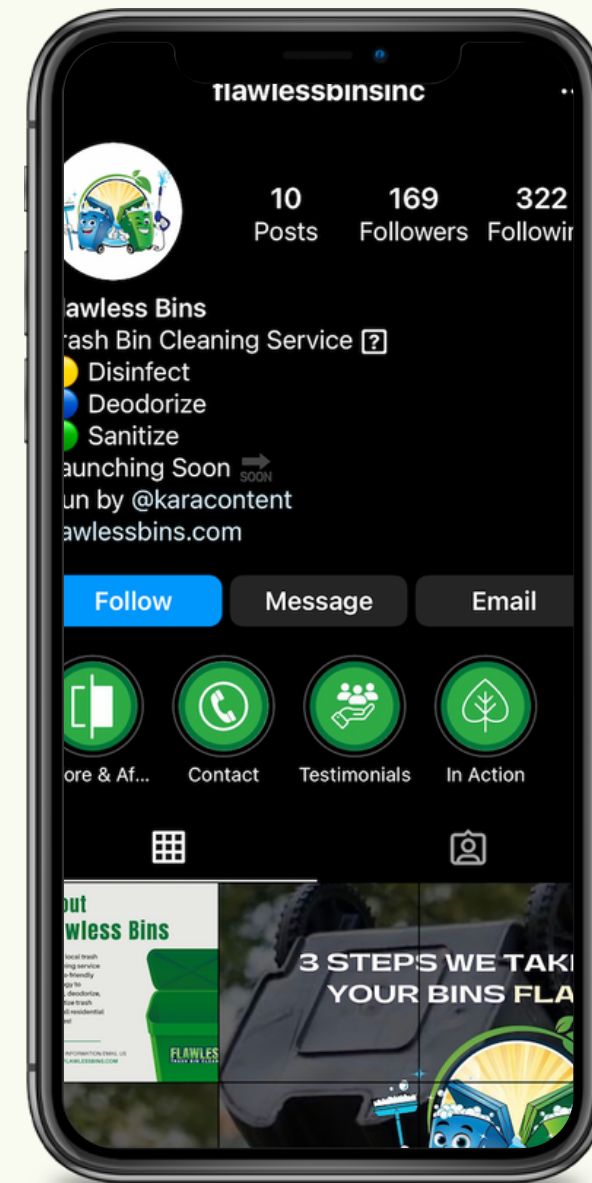

We are a local trash bin cleaning service using high-quality eco-friendly technology to disinfect, deodorize, and sanitize trash bins for all residential properties!

With Flawless Bins and our high pressure hot water cleaning system, customers can rest assured that they won't be at risk of illness from unwanted germs and bacteria.

How often people clean their bins

Not At All:

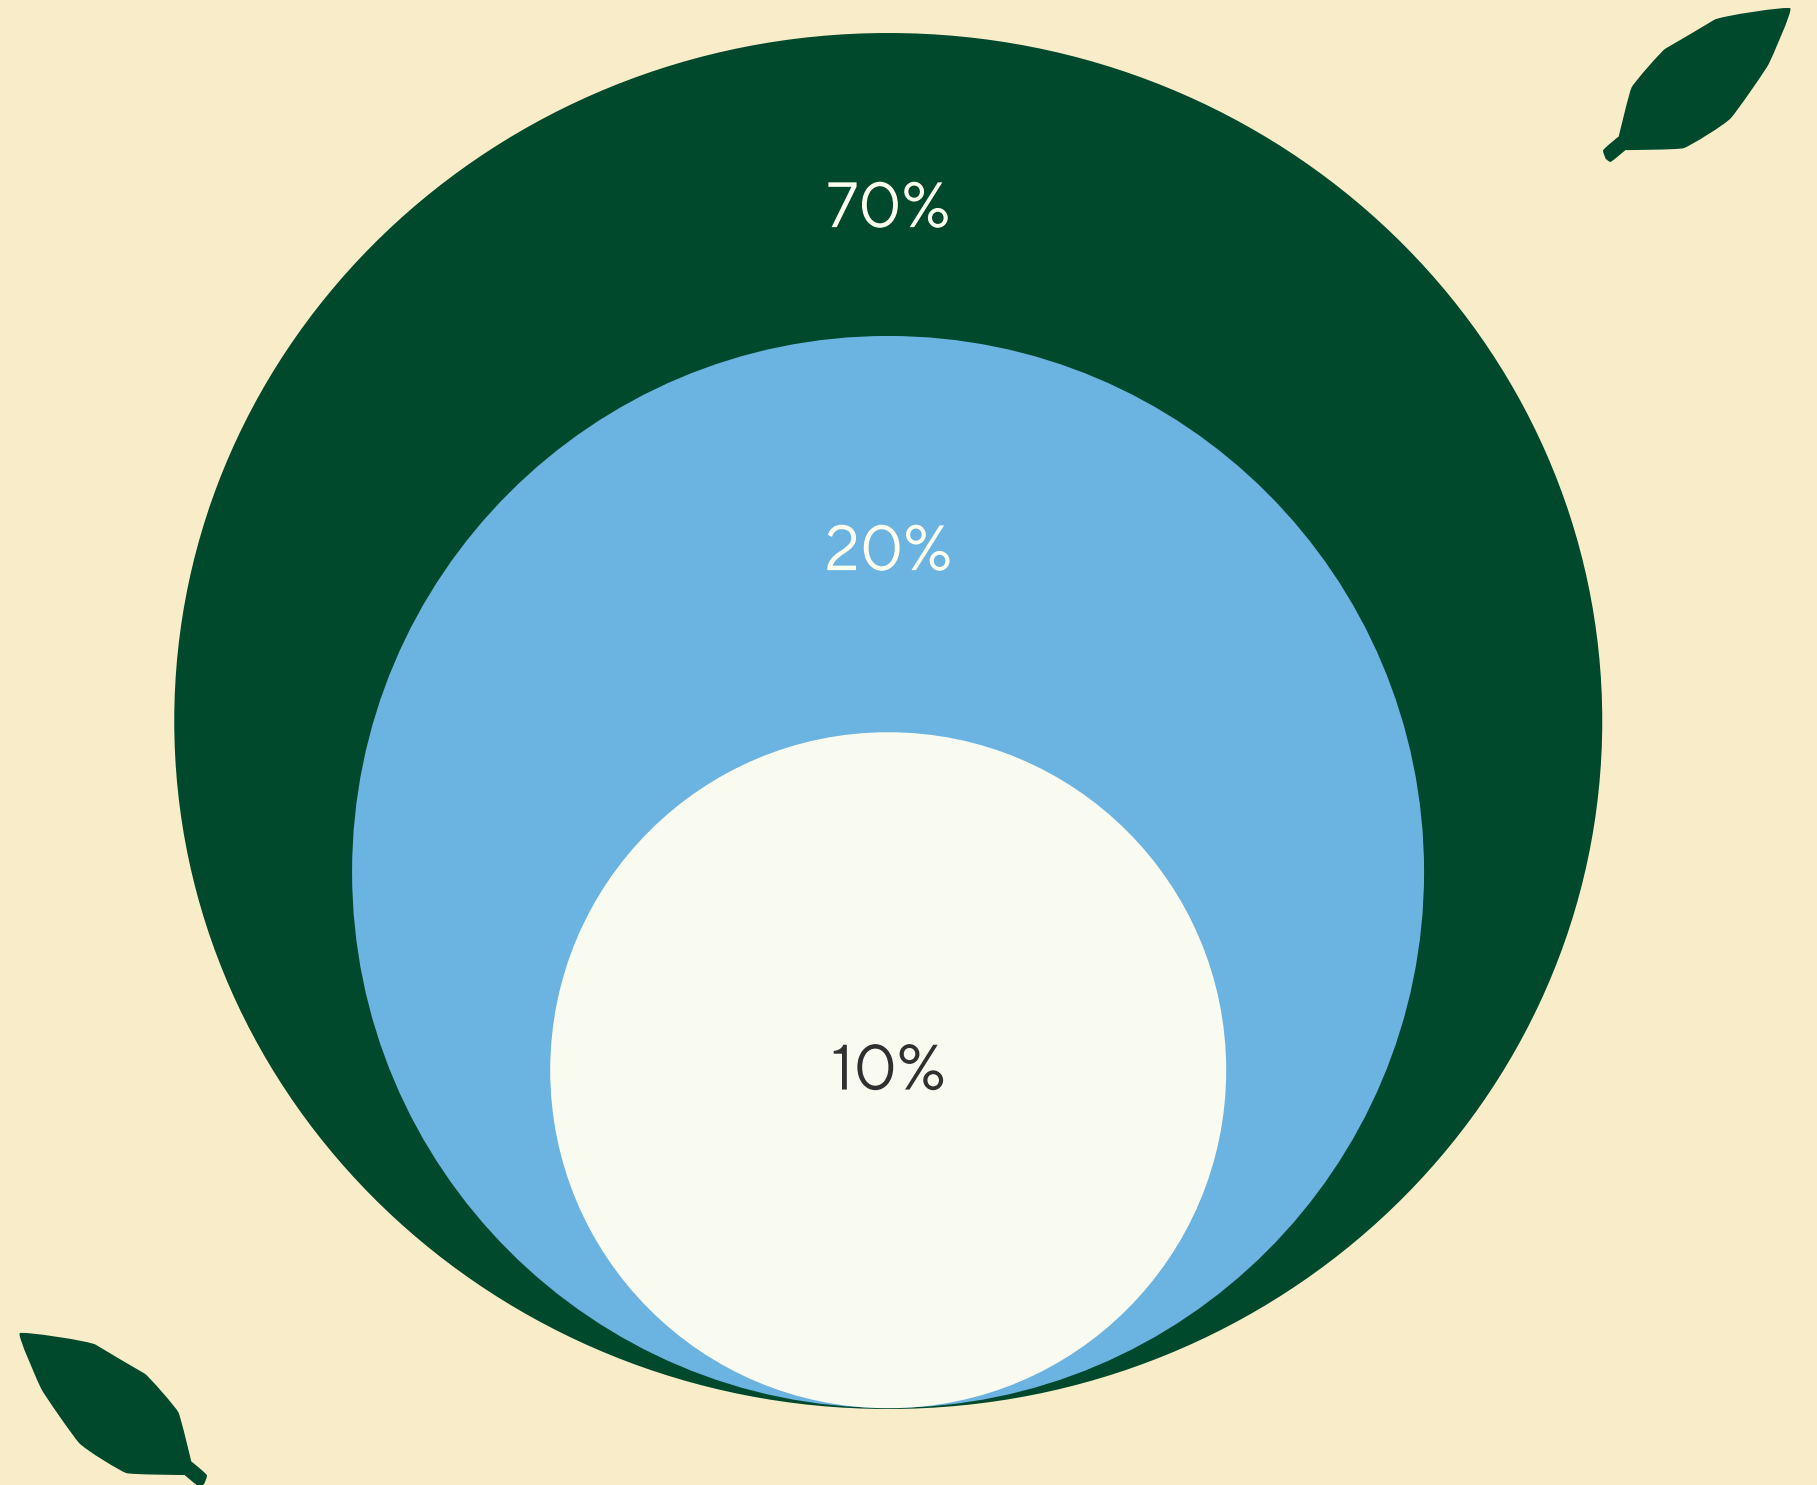

70%

Once Every Few Months:

20%

Once a Month:

10%

We recommend cleaning trash bins after every trash day or at least once a month.

Competitive Advantage 1: Non-Toxic

We don't use bleach and harsh chemicals. All of our cleaning products are FDA approved!

Competitive Advantage 2: Eco-Friendly

We are eco-friendly by bringing our own water and properly disposing it at a dump site. With our 200 degree water system, water is concentrated on the bin and not its surroundings and bacteria and toxins are collected onto the truck instead of remaining in waste water.

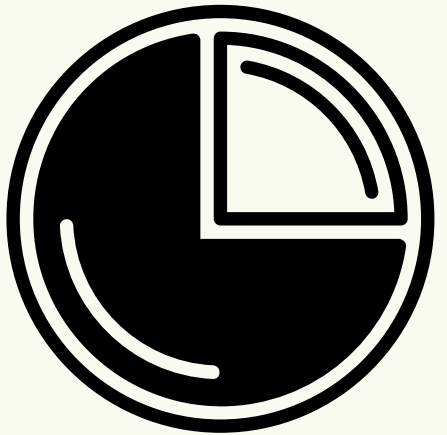

Competitive Advantage 3: Clean Community

Deep cleaning all the trash cans in a community will result in cleaner smelling streets and less animals, disease spreading bacteria and insects.

SERVICES

Monthly: \$25 for 2 bins + \$10/additional bin

Quarterly: \$40 for 2 bins + \$20/additional bin

1 Time: \$60 for 2 bins + \$30/additional bin
