

# AI VOICE ASSISTANTS

## What is Artificial Intelligence (AI)?

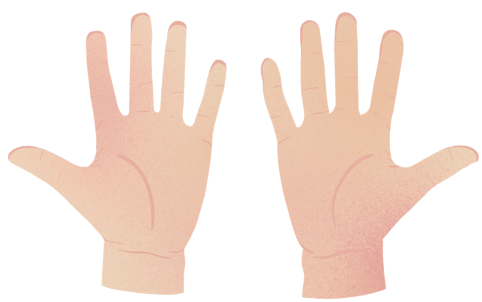

- Technology that lets computers “think and learn” like people

## What are AI Voice Assistants?

- Recognize your voice, answer questions, set reminders, play music, etc.
- Eg: Siri, Alexa, Google Assistant

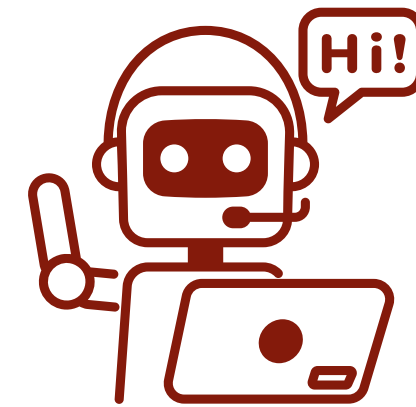

## How Can Voice Assistants Help You?

### HANDS-FREE HELP:

Use your voice instead of your hands when busy or limited by mobility

### INDEPENDENCE & COMPANIONSHIP:

Manage daily life on your own + enjoy music, jokes, and conversation

### VISION & DEXTERITY SUPPORT:

No need to read tiny text or press small buttons

### MEMORY AID:

Get reminders for medications, appointments, and tasks

## Meet Your Digital Helpers

### SIRI

- Apple Devices
- Say, "Hey Siri" to activate

### ALEXA

- Amazon Echo Speaker
- Say, "Alexa"

### GOOGLE ASSISTANT

- Android Devices
- Say, "Hey Google"

## What You Can Ask Your Assistant

### MEMORY & REMINDERS:

"Remind me to take my medication at 8 AM"

### ORGANIZATION

"Add doctor's appointment to my calendar"

### COMMUNICATION:

"Call my daughter"

### INDEPENDENCE

"Turn off the lights"

## Privacy Tips

- **You're in control** - Say no to features you don't want
- **Wake word only** - Devices only "listen" after the wake word
- **Mute or turn off** - Turn off at any time
- **Manage your history** - Review or delete recordings in settings
- **Use secure wifi** - Avoid public Wi-Fi for setup and daily use
- **Ask your device** - "How do you protect my privacy?"
