## About DRIVEN-4

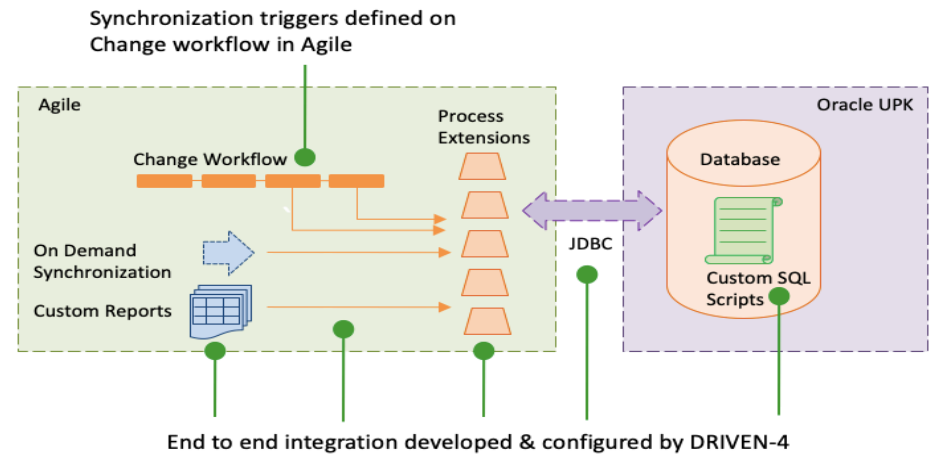

The DRIVEN-4 core team benefits from a deep background in IT & enterprise application implementations. Specialize in technologies and services that boost operational efficiency, improve collaboration and spark innovation. Our experience in product delivery and industry knowledge provides unique perspective on software architectures and large software implementations.

### Case Study #1 Integration

**Customer Need:** Training records created in Agile to be synchronized with UPK. Bi-directional integration.

Training result from UPK to be updated in Agile.

#### Our Approach:

**Key Success Factors:** Customer did not have access to UPK developers. DRIVEN-4 took this situation as a challenge. Development team studied UPK and developed UPK customizations as well.
