NRG FIRE CONSULTING

Partnering with our Customers to Create Solutions for Fire and Life Safety Challenges

ALARM SYSTEM DESIGN SERVICES

When it comes to fire and life safety, NRG has you covered. Our comprehensive offerings provide one source for almost any project and site, new or existing throughout North America. Alarm System Design is one of the most volatile in fire protection. Rapidly evolving codes, local requirements, areas of protection, and advances in components require accurate communication and product knowledge. Our in house training programs provide for the most competent staff in the business. Below are some of the services our design team are experts in:

Alarm System Design:

- Fire Alarm System Design

- Mass Notification Design

- Emergency Responder Radio

- Security System Design

- Alarm System Survey and Analysis

- Alarm System Plan review

- Written Spec, Submittal Level, Installation Quality

Other services offered include Fire Protection Consulting, Life Safety Consulting, Fire Suppression Systems Design, Fire Protection and Life Safety Field Services, and Construction Administration.

We always strive to exceed our clients' expectations; saving time and money while protecting assets. Our services bring peace of mind at reasonable costs, enabling our customers to focus on their business.
