

Client Engineering & Development Services

Vativ provides **embedded engineering and development services** that extend your team’s capacity without sacrificing quality or control. Led by executives with 20+ years of experience in **program management, SDLC, Agile delivery, vendor management, and enterprise architecture**, we integrate seamlessly into your organization to accelerate product delivery, modernize applications, and responsibly embed **AI and intelligent automation**—with built-in governance, ethics frameworks, and measurable engineering outcomes.

Engineering & AI Service Areas

Application Development

Custom & Platform

Full-stack application design, development, and deployment across cloud-native, ServiceNow, and Salesforce platforms.

SDLC & DevOps

Process & Tooling

CI/CD pipeline implementation, automated testing, release management, and engineering process optimization.

Product Engineering

Strategy to Delivery

Product roadmap execution, backlog mgmt, sprint planning, and Agile maturity coaching to elevate team practices and delivery velocity.

Platform Modernization

Legacy to Cloud

Legacy application assessment, migration planning, re-platforming, and cloud-native architecture design.

AI Engineering

Governance & Ethics

Agentic AI, ML model integration, responsible AI frameworks, bias mitigation, and AI governance policy development.

Integration & APIs

Connect & Orchestrate

Enterprise integration architecture, API design and management, middleware, and data flow orchestration.

Engagement Models

- Embedded Teams**
 Dedicated engineers integrated into your workflows, tools, and cadence
- Project-Based Delivery**
 Scoped engagements with defined milestones, timelines, and outcomes
- Staff Augmentation**
 Specialized talent to fill skill gaps and accelerate critical initiatives
- Advisory & PMO**
 Strategic oversight, governance frameworks, and delivery assurance

Why Vativ Engineering?

- ✓ Led by executives with 20+ years in program mgmt, SDLC, and enterprise delivery
- ✓ AI-forward with built-in governance — ethics frameworks, bias controls, and responsible adoption
- ✓ Deep Agile expertise — we don’t just follow the framework, we’ve built delivery orgs around it
- ✓ Cross-platform fluency: ServiceNow, Salesforce, cloud-native, AI/ML, and custom development
- ✓ Hybrid delivery: onshore, nearshore, offshore for senior-level results at practical cost
