

Hi,
Thank you for being the most important part of The Ogleby Family. What you will discover as you get to know Ogleby, is that we create extraordinary natural and organic beauty products for everyday living. With each use we are welcoming you to a new experience, filled with love for your body, nutrition for your skin and ease for your mind. Our products are all specifically designed for you, by a staff that really cares about clean healthy living.
May this day and every day be filled with family, friends, and good cheer. - Ogleby Family

How To Care For Your Natural Soap Bars

The products you find here at Ogleby Sisters Soap are natural and organic, which means they prefer to be treated differently than other products. Here are a few steps to remember to preserve each bar:

1. The fragrances can and will migrate. Always remember to store your soap bars within 5 inches of each other. This will prevent the scent from mixing with another scented bar.
2. Natural bar soaps require air circulation, so please remember to keep your soap somewhere they can breath.
3. The bars of soap will always clean and moisturize you however the scent will begin to fade in about one year. Most of the time, the fragrance becomes lessened when the soap dries to the point that the fragrance can no longer turn into a vapor. If you try running them under some water to wash away the dry layers the fragrance should come back as long as the soap is not several years old. You can also try shaving the outer layer away very gently as well.
4. In between uses and during time in the shower, remember to keep soap in a dry place. Keeping it away from running water will preserve the soaps longevity and prevent it from melting.

Bar Soap Ingredients

Ogleby natural soaps are made with the following ingredients as their base:

Olive Oil, Coconut Oil, Palm Oil, Water, Sodium Hydroxide, Shea Butter.

Ogleby organic soaps are made with the following ingredients as their base:

EXTRAORDINARY BATH PRODUCTS FOR EXTRAORDINARY WELL-BEING.

- Ogleby aesthetic experts have created products to transform your skin - naturally.
- The benefits can be seen instantly and have lasting memorable results.
- Restore a radiant complexion. Release stress. Regain incredible energy.
- We have beauty products that offer effective solutions to any of your skincare needs.
- The most effective plant based ingredients – recognized around the world – have been combined and fine-tuned to your needs, to meet your expectations. Ogleby’s plant based ingredients nourishes skin deep down, yet feels refreshingly weightless. Gently lift away dirt, while guarding against drying and environmental damage. Ogleby is exceptionally kind to hair and body, leaving them thoroughly cleansed and silky soft. Rich. Gentle. Thorough.

NEW SKIN CELLS ARE CONSTANTLY EMERGING. HOW SHOULD I TAKE CARE OF MY SKIN?

- According to Harvard Health, “Each day, our bodies millions of cells divide and then recreate themselves”. What I am putting on or in my body will end up in my cells. Every minute our cells turn over 8 times. Ask yourself “what will my cells look like 10 minutes from now”?
- Rest. 7 to 8 hours of beauty rest each night
- 8 glasses of water each day
- Choose natural and organic skin care products
- Being well-nourished by vitamins, minerals, hydration, oxygen and antioxidants. Vitamins the NIH, National Institutes of Health, reports are crucial for you to make healthy skin cells are A, C, D, E, K and the B vitamins. Minerals recommended include copper, zinc and selenium. And the great news is – many of these nutrients are in the ingredients found in Ogleby.

HOW TO DECIDE ON YOUR SKIN CARE PRODUCTS

- Know who you are buying from, and their product integrity
- Check out the ingredient label. Putting chemicals onto your skin through your skin care and hair care - can and will - get into your bloodstream. The Environmental Working Group published studies that found toxic chemicals in the umbilical cord blood of newborn babies born in the U.S. They screened for more than 400 chemicals, and an astounding 287 toxins were detected within the umbilical cord blood of these newborns. Of these 287 chemicals, 217 were neurotoxins, and 208 are known to damage growth development or cause birth defects.

CRUELTY FREE.

- Guaranteed Safe. All Ogleby products are made in the USA.
- Most Ogleby products carry high organic content, are USDA certified, and made in an FDA approved 35,000 square foot facility.
- No testing is done on animals. We conduct state of the art tests on our staff members and other human volunteers.
- Tolerance and aggressive sensitivity is tested to optimize proven-safe and natural collaboration between ingredients and skin types.
- Approved by renowned chemists and healthcare professionals.

RECYCLABLE AND REUSABLE PACKAGING.

- Guilt free packaging.
- Buy BULK. Great for your wallet and the environment.
- Ogleby's packaging is recyclable. Products are nontoxic, biodegradable and developed with sustainable, plant-based ingredients.
- Buy Ogleby gallon size and pour into an existing container from your home or we carry a refillable size as well.
- Think Plastic Bottles. According to Forbes we are now at 1 million plastic bottles per minute. 91% of which are not recycled. Some people won't even let that plastic touch their skin. 8 glasses of water per day could result in \$1,400 per year saved by using a drinking glass or portable container.
- Visit EPA.GOV (United States Environmental Protection Agency) for more information

PROUDLY WOMAN-OWNED & OPERATED. We're beyond thrilled to be a respected organization that is owned and operated by a woman.

THANK YOU for trusting Ogleby – from a staff that truly cares about your physical, emotional and mental well-being. And we know that all starts with skin care.
