

Responsible pet ownership through reliable veterinary care

Resources for Koi, Goldfish and Other Aquatic Animal Owners

Dr. Johnathan Magerkorth offers many services for owners of Koi, Goldfish, and other Aquatic Animals. These services are initiated by the owner for a habitat evaluation at the location of the pond or tank in most situations. Given the length of time involved in transportation and information gathering, this service is scheduled outside of our regular business hours on the week-ends.

Phone consultations are also available, but will be limited to only the conversation and photographs the owner submits for Dr. Magerkorth to base a recommendation on.

Some Resources for pet fish owners follow:
