

Power BI Training **Built for Business**

From raw data to actionable insights. Fast, practical, and tailored to
your team's schedule.

”

Most software training puts people to sleep. We teach your team how to build dashboards they will actually use.

”

THE VBIC PHILOSOPHY

Why Our Training **Works**

Zero Fluff

We skip the boring, abstract academic theory. Our training focuses strictly on the practical workflows Business Intelligence developers use every day.

Real Scenarios

Trainees build a continuous, real-world project throughout the program. No disjointed examples; just a start-to-finish data journey.

Immediate ROI

Whether they take the 2-day or 4-week path, your staff will walk away capable of automating reports and saving hours of manual Excel work.

Choose Your **Pathway**

Flexible training options designed to match your team's time and technical needs. In
Person or Remote training available.

Option 1: The 2-Day **Bootcamp**

THE "QUICK WIN" TRACK

Perfect for managers, analysts, or teams who need to generate basic reports and interactive dashboards immediately, without getting bogged down in complex coding.

- ✓ **Day 1:** Connect to files, clean messy data using Power Query, and basic formatting.
- ✓ **Day 2:** Build essential visuals (bars, lines, KPIs), add interactive slicers, and publish to the cloud.
- 🎯 **Target Audience:** Beginners needing fast, functional reporting skills.

Option 2: The 3-Day Intensive

THE "DATA BUILDER" TRACK

Includes everything in the Bootcamp, plus a deep dive into the "Engine Room." Crucial for users who need to combine multiple data sources (like Sales and HR data).

- 📅 **Days 1 & 2:** Data Cleaning and Visual Storytelling.
- 🔗 **Day 3:** The Star Schema, building table relationships, and creating the master Calendar table.
- 📊 **Day 3 Bonus:** Introduction to basic DAX formulas (SUM, DIVIDE, CALCULATE).

Option 3: The 4-Week **Masterclass**

The "Zero to Hero" track. A comprehensive, paced program designed to forge in-house BI champions capable of architecting enterprise-grade solutions.

Week 1: Clean

Mastering Power Query to automate the extraction, transformation, and loading (ETL) of messy, real-world data.

Week 2: Model

Architecting robust relationship models and diving deeper into intermediate DAX calculations and time intelligence.

Week 3 & 4: Deploy

Advanced visual storytelling, UX design, publishing to Workspaces, and scheduling automated cloud refreshes.

Which path fits **your team?**

Let's discuss your data goals and get your team upskilled.
