

Community Infrastructure Plan

Who is Plug Zen?

Q JOHNSON

A Detroit-based, minority-owned business founded by **Kwabena 'Q' Johnson**, a 25-year automotive and military (U.S.M.C.) veteran focused on delivering an adaptive, cost effective EV charging solution.

EV CHARGING SOLUTIONS

Who

Who are we asking to partner with us?

- Automakers
 - G.M., Ford, Stellantis, etc.
- Utility Companies
- Federal Government (DOT,EPA)
- State & Local governments
- Community Organizations
- Property Owners/REITs

What Problem Are We Solving?

Billions of federal dollars have been set aside for EV infrastructure, but low income and disadvantaged communities will be miss this opportunity to get involved.

What will we do to Include these communities

What

Create partnerships with stakeholders to install

- Multi-vehicle charging stations
- EV Ready Homes

When should we launch this program

When

April 2022

- New York Auto Show
- Earth Day Events

Where are the markets we are focusing on?

Where

- East - NY, FL, PA, NJ
- West - CA, WA, AZ
- Midwest - MI, IL, OH, IN, MO
- South - GA, NC, KY, TN, TX

Why should WE Do This?

Millions of non-traditional EV drivers live in communities are affected by global warming just as much as their neighbors who live in affluent communities, or perhaps even more because of their inability to recover as quickly as communities with traditional EV drivers (affluent homeowners), this program will give them an equal opportunity to address global warming and help ensure our planet is sustainable for future generations.

Our success is the world's success!!

How do partners participate?

Align their resources to reach these communities

How

**How will
it work?**

How will communities be empowered?

- Multi-vehicle charging in apartment complexes, parks, local grocery stores, restaurants, community meeting places & religious establishments
- EV ready Homes- 220 VAC outlet in the garage or exterior wall near driveway
- * Incentivize landlords to install them in rental properties
