

CAPABILITY STATEMENT

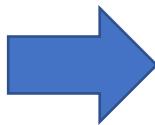

P2P, LLC

Plastic 2 Petrol refines one time use plastic into petroleum products to reduce waste and create a sustainable environment. We strive for fast turn around times. Using our chemical processes from the moment plastic enters our facility to the time it leaves, providing on-demand oil and quick delivery to our customers.

CORE COMPETENCIES:

- Premium refined oil
- Significantly reduced Sulfur and salt content per barrel
- Creating fuel from used plastic

DIFFERENTIATORS:

- Competitive and adjustable pricing based on volatile market
- Efficiency and streamline processes for fast throughput
- Incorporating latest energy efficiency and environmentally friendly designs
- Near zero pollutant emission in the refining process
