

A woman with long, wavy blonde hair is lying on her side, looking up towards the sky with her eyes closed. She is wearing an orange, strapless top. The background is a soft, out-of-focus landscape with warm, golden light, suggesting a sunset or sunrise. The overall mood is serene and peaceful.

VITALITY

WELCOME TO THE NEXT ERA

Ergoline

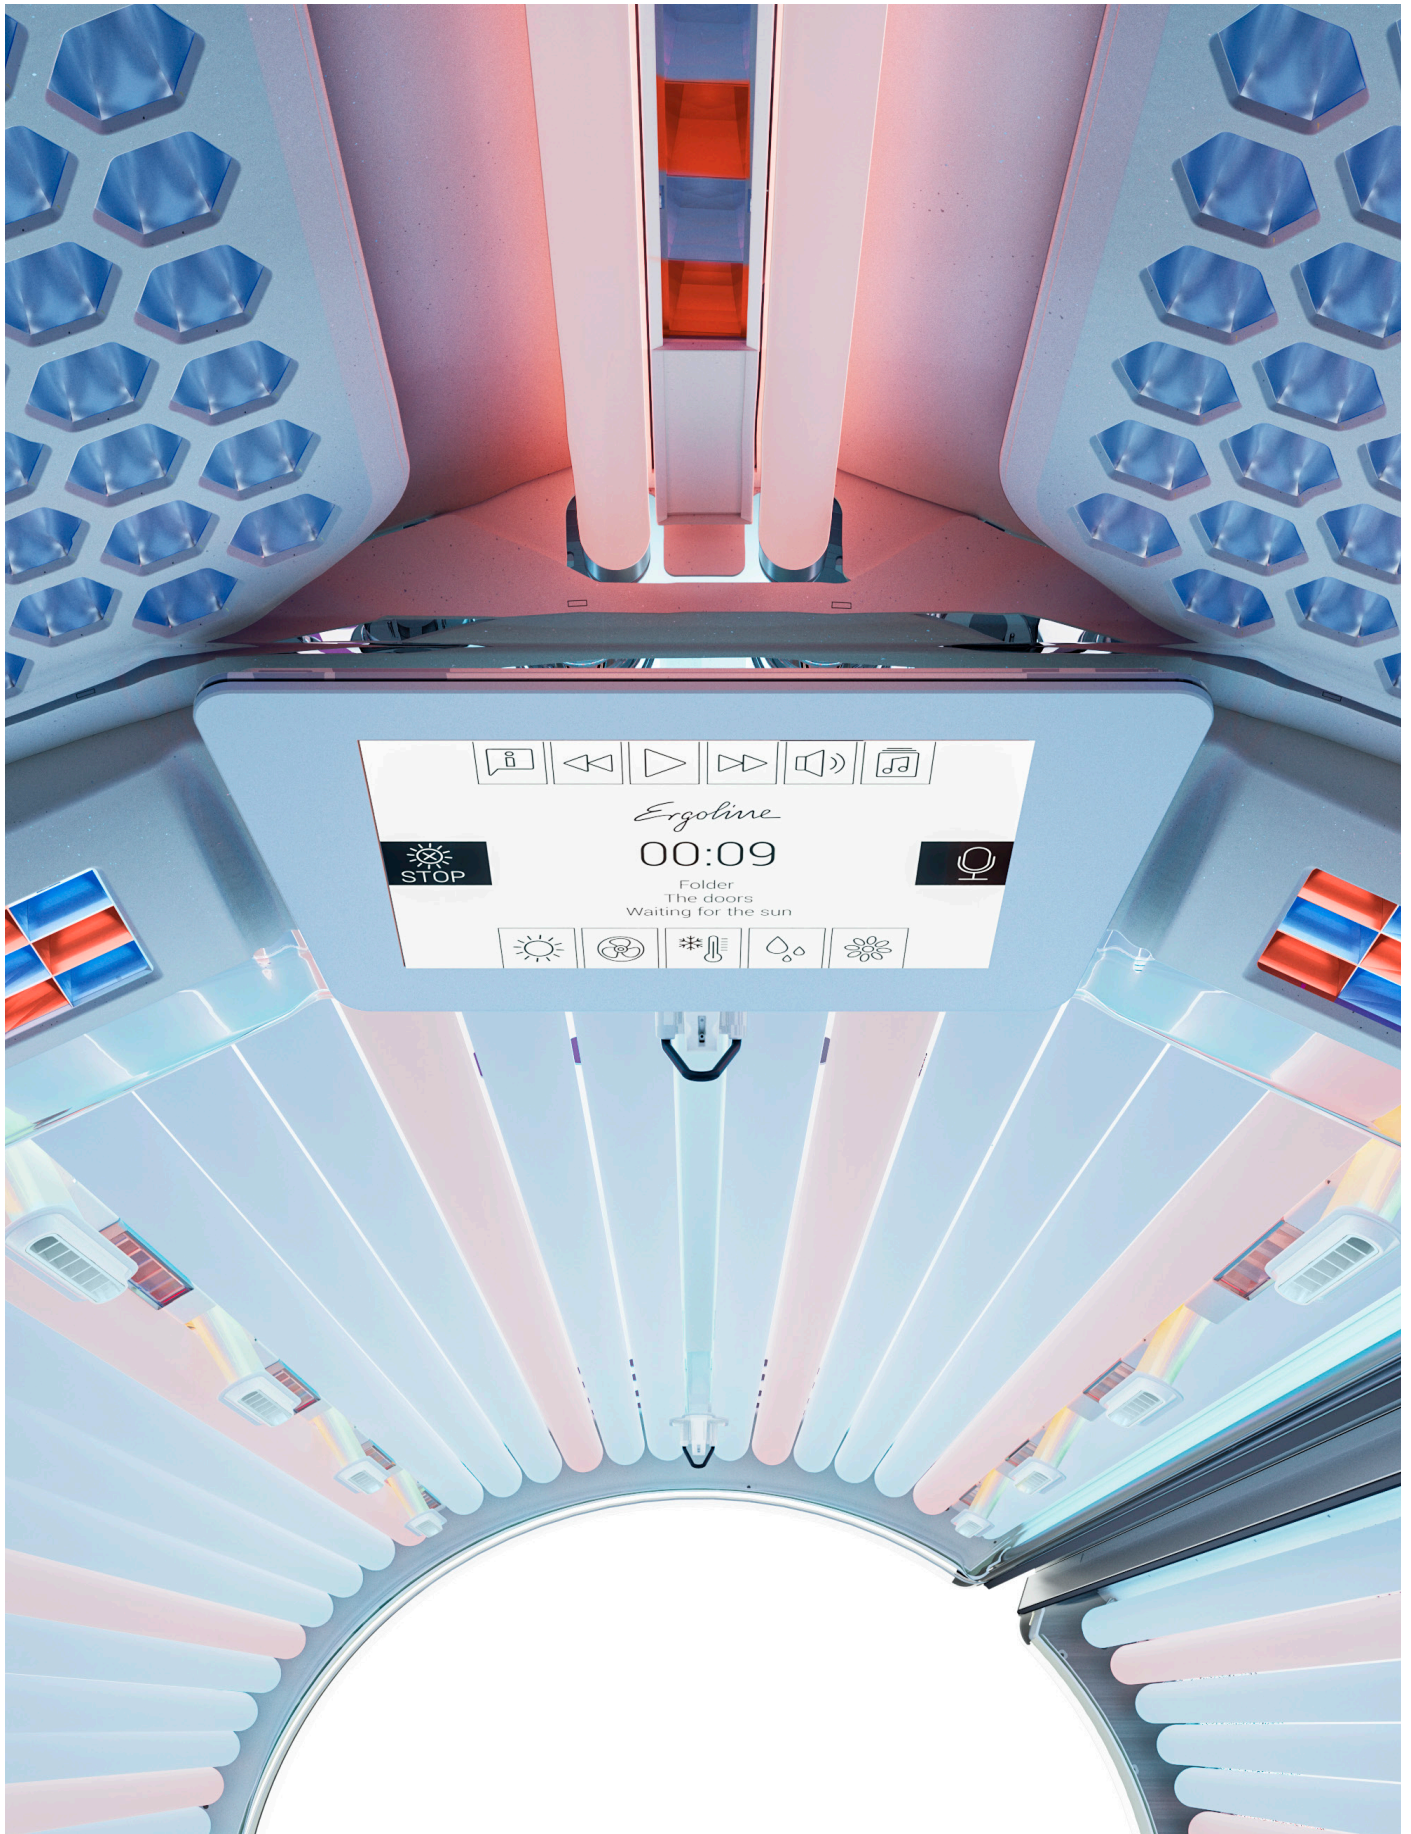

VITALITY BY ERGOLINE

VISIONARY TECHNOLOGY FOR A SUCCESSFUL FUTURE

For more than 35 years Ergoline has been the worlds leading indoor tanning brand and has been focused on providing its customers with state-of-the-art innovation in UV and light technologies. From traditional UV to hybrid treatments, and the introduction of Total Light Technology, Ergoline has the right equipment to suit a variety of needs and business models. Ergoline is your long term partner in success, bringing its customers the most dependable and high-quality equipment on the market.

VITALITY BY ERGOLINE

THE WORLD'S FIRST. A TRIO OF UV & LIGHT TECHNOLOGY

VI·TAL·I·TY

/VĪ'TALƏDĒ/

definition: the state of being strong and active; energy.

TOTAL LIGHT TECHNOLOGY

RED LIGHT, BLUE LIGHT & UV LIGHT

Total Light Technology represents a new era in combined UV and light technology. This combination of Red Light, Blue Light and UV provides optimal tanning results and high levels of client customization to each and every session. Your customers demand the very best and Total Light Technology is here to meet increasing demands for innovation and individualized results. The addition of Blue Light enhances the tanning environment and provides an energizing experience during a session.

For the first time, Total Light Technology provides users with full session control to focus on their individual tanning and color development goals. From personalized control of UV Settings to a fully UV-Free Session, users will love the freedom to custom tailor each session to their desired output.

HYBRID LIGHT TECHNOLOGY

RED LIGHT & UV LIGHT

The combination of Red Light and UV offers the ultimate tanning experience and more natural looking results. Hybrid Light Technology has quickly become the new industry standard for perfect color development and skin care combined. Customize output with Hybrid Light Technology by adjusting various settings during a session. These customizations include Red Light Only Facial Sessions, Personal Sunstyle for full body Hybrid Tanning and more.

PURE LIGHT TECHNOLOGY

PURE UV LIGHT

Innovation and durability have remained a singular focus for Ergoline product development, and Pure Light Technology is no different. Bringing energy efficient tanning technology forward into multiple unit levels, Pure Light Technology is a combination of Spectra LED UV Tanning Technology and traditional tanning lamps. Drastically reducing the operational, environmental and financial impacts of daily operations by reducing energy consumption and lamp changes. Pure Light Technology is the next step in UV tanning.

FEATURES & TECHNOLOGIES EXCLUSIVE AT ERGOLINE

SPECTRA THE NEW TANNING EXPERIENCE

Because our skin deserves the best.

Conventional high-pressure facials generate UV but require high heat levels to achieve results, this combination creates post-session irritation or erythema. With Ergoline Spectra, only the desired light spectra are generated and irritation-causing heat output is drastically reduced. UVA LEDs produce an instantly visible tan. Spaghetti lamps complement the light spectrum with UVB. The optimised light spectrum delivers a comfortable and effective tanning experience unlike anything experienced before.

ERGOLINE SPECTRA

THE WORLD'S FIRST **LED FACIAL TECHNOLOGY** BY ERGOLINE

Welcome to Ergoline Spectra. A new era in UV and light technology.

The combination of LED technology and UV Tanning has been a long-awaited partnership, and Ergoline Spectra is the world's first. The LED facial tanner reduces power consumption by up to 80% and has a 20,000 hour life time. Significantly reducing heat production and skin irritation, Spectra by Ergoline delivers a better tanning performance than ever before. The optimized light spectrum delivers a comfortable and effective tanning experience, while still allowing individual control of the facial tanners. Ergoline Spectra is the ultimate step forward in innovation, sustainability and results. Experience the new spectra of light!

OPTIMIZED **TAN**

CONSISTENT HIGH PERFORMANCE

Say good-bye to reduced performance in aging high-pressure facial lamps. The tanning performance of the high-power LEDs remains virtually constant throughout the entire life time.

ADVANCED RESULTS

The Spectra LED technology enables a more homogenous distribution of sunlight eliminating hotspots. For an even and effective tan over the entire facial area.

OPTIMIZED SPECTRUM OF EFFICACY

The optimized spectrum of UVA LEDs and UVB spaghetti-lamps improves tanning results without additional heat generation. Ergoline Spectra simultaneously creates maximum tanning results and client comfort.

COMPLETE **COMFORT**

COMFORTABLE

Spectra is the new series benchmark for quiet and gentle yet supremely effective tanning. Even the unpleasant shutdown of the high pressure lamps at the end of the tanning session is now a thing of the past.

EFFICIENT

Reduced ventilation noise, particularly in the facial area, ensures a quieter tanning session. This enables the whole Spectra tanning experience to be quieter, calmer and more relaxing. Vitality. A completely new tanning experience.

ACTIVATING BLUE LIGHT

Energized and Improved.

Blue light activates the organism, has energizing properties and boosts the vitality of the whole body. In the skin it acts like a conductor to ensure that the individual light reactions are well-coordinated. The introduction of Blue Light Technology to the Vitality line of products is the next level of client comfort, and efficiency. The use of the Activating Light Technology (patent pending in Switzerland) allows more intense tanning results with the same UV dose.

PERSONAL SUNSTYLE

Choose your TAN, from Sensitive to Intense.

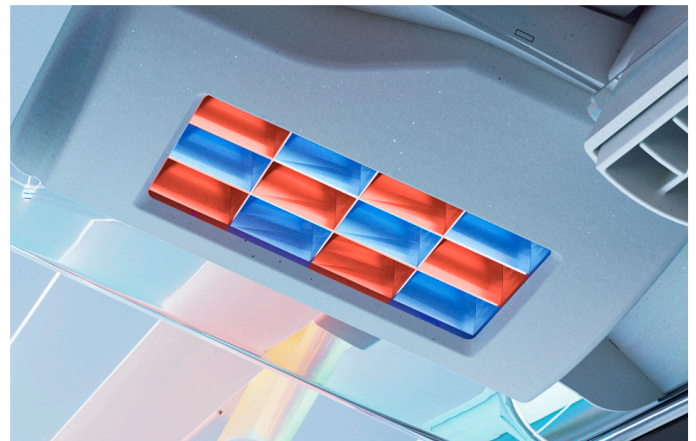

The tan you want at the touch of a button! Users can choose their own personalized tanning experience from three tanning programs. Whether they want a light tan or an immediate visible deep tan: Personal Sunstyle offers ideal tanning for any customer. The intensity of the UV performance can be adjusted at any time during the tanning session or switched off completely. This means it is also possible to enjoy a UV-free skincare treatment just with Red Light.

PERSONAL SKINCARE

Advanced skincare with advanced options.

Allows skin care customization during your session at the touch of a button. Using the Interior Touch Control, clients may choose to reduce or turn off UV in both the body and facial areas for a skin care only session utilizing Red Light and Blue Light LED's.

SHOULDER TAN

Beautiful tan and skincare.

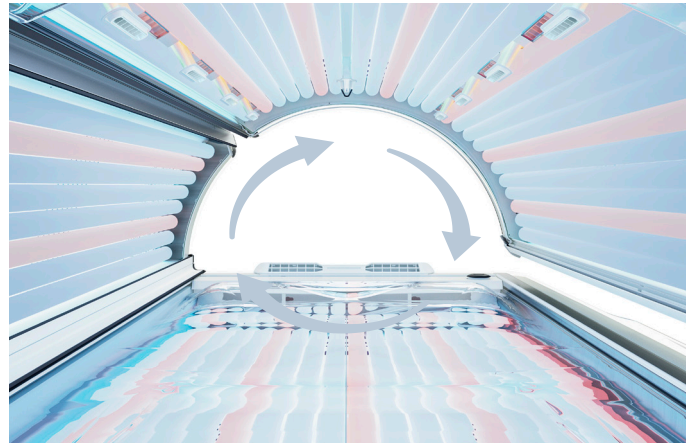

Vitality by Ergoline offers the worlds only combination of UVA LEDs for a beautiful tan with additional skincare in the shoulder area. The fully re-designed shoulder tanner provides improved performance and reduces energy consumption of the shoulder tanners by 80 % compared with the previous model.

TEMPTRONIC

Perfect climate, from head to toe.

The 3-zone ventilation provides the most comfortable and customizable climate controlled experience ever in an Ergoline sunbed. Foot, body and face ventilation can be individually adjusted in combination with optional relaxation features like Aqua Mist and Aroma. Whether it's refreshingly cool or warm and cozy – with Temptronic you can achieve and maintain your ideal temperature, even with high external temperatures. As a result of the lower heat development of the Spectra LED facial tanner, volume and cooling are once again optimized.

SMART CONTROL PLUS

Intuitive operation while tanning.

The smart control plus 7" interior touch display makes the sunbed operation easier than ever. When tanning starts, the display changes to black and white mode, which makes it much easier to read, even when wearing UV protective eyewear. The self-explanatory operation makes it easy and intuitive to change all settings.

EXTERIOR TOUCH CONTROL

Add your own videos.

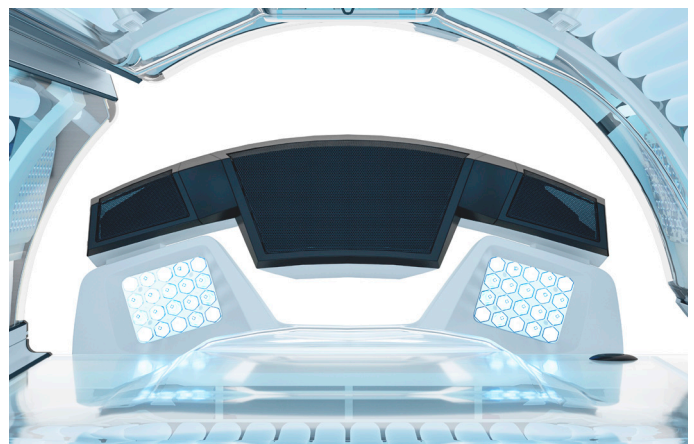

The smart video function offers the option of playing tutorial videos and even your own branded advertisements and promotions. Another new feature is the demo mode, which can be used to explain the sunbed to your customers. The exterior control panel with smart video ensures each and every customer receives the highest level experience and fully utilizes all features and benefits of your Ergoline equipment.

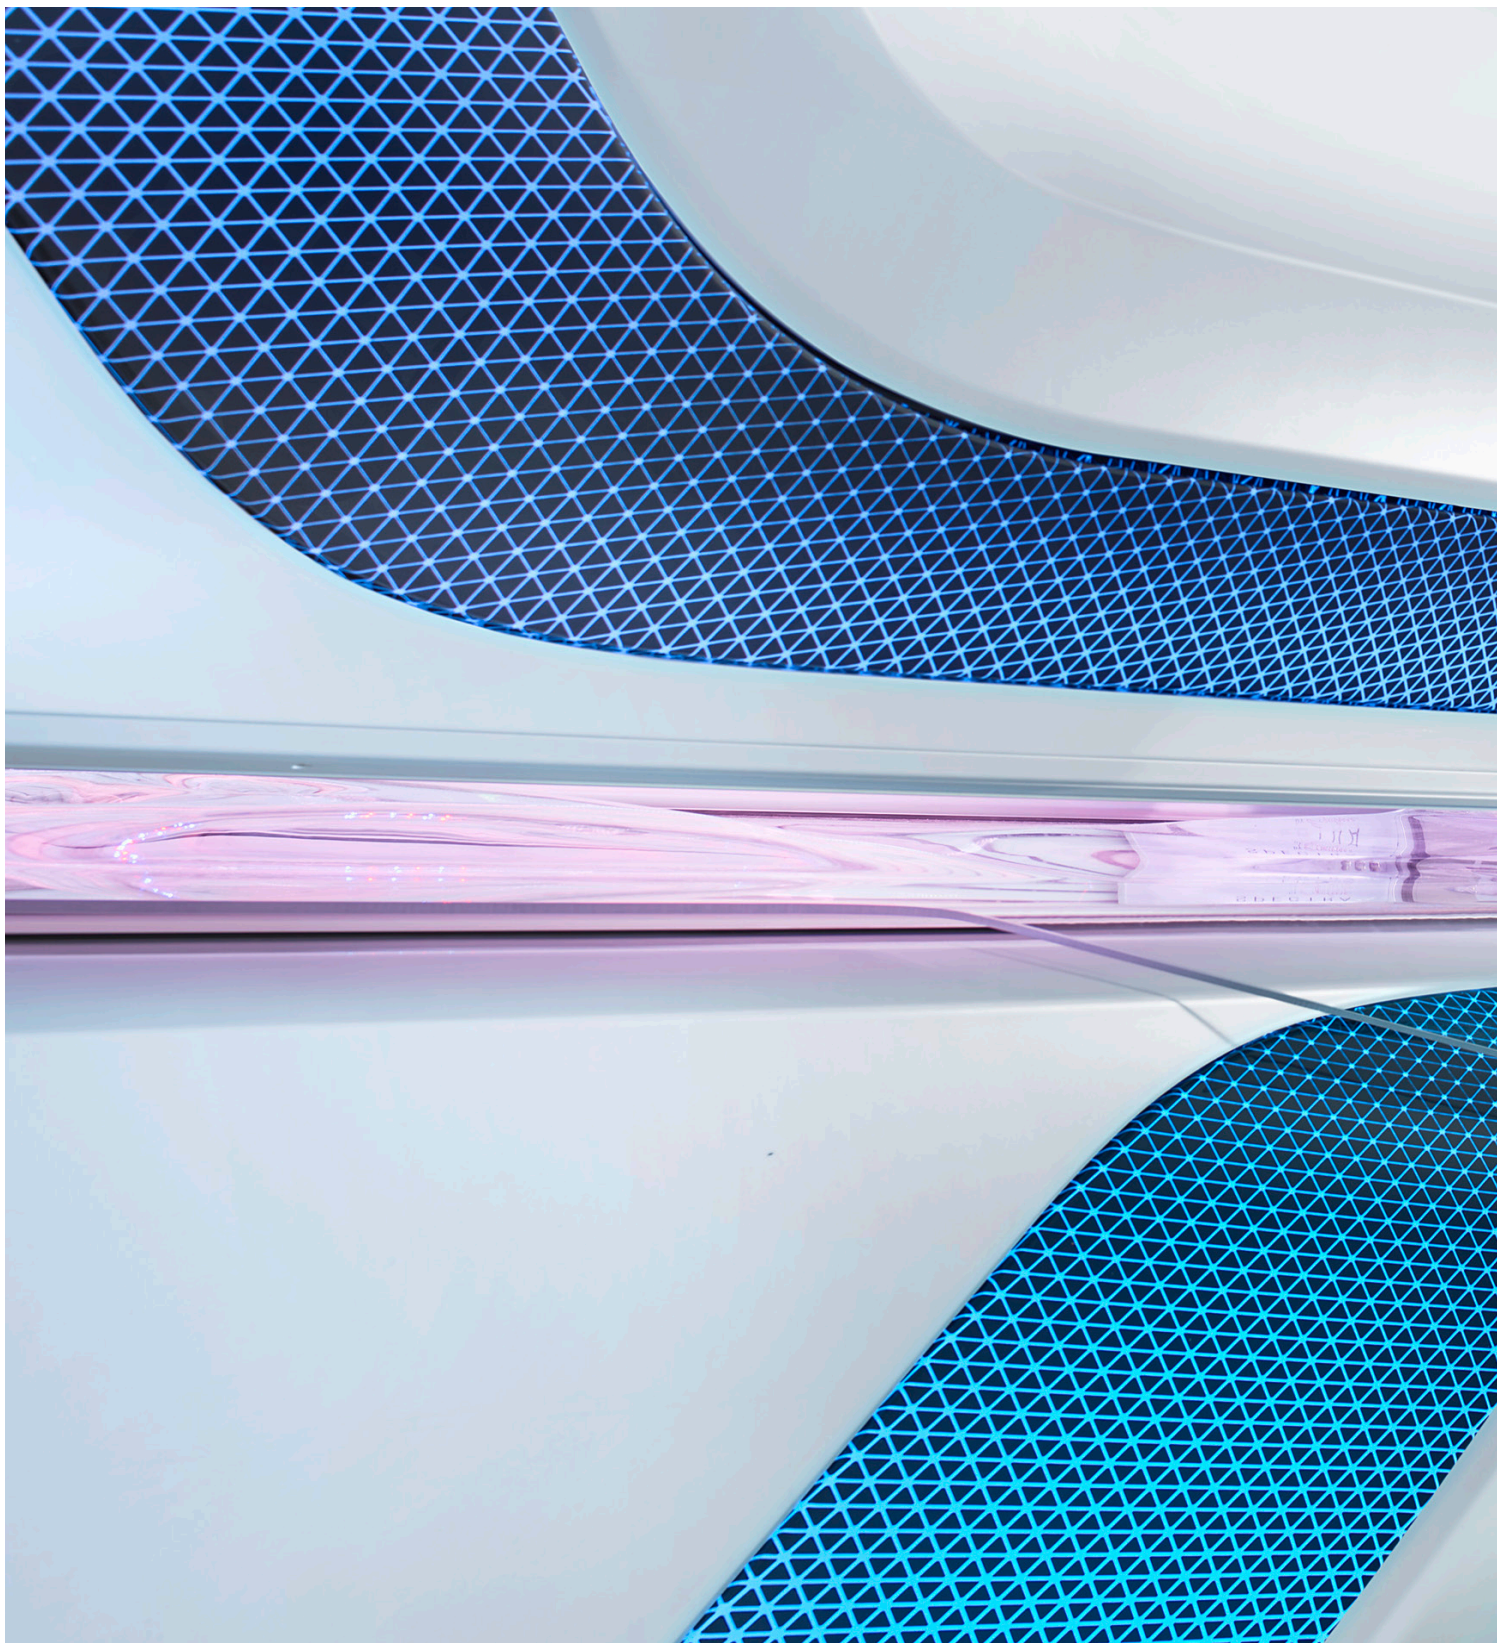

CINEMATIC SOUND

Energized and Improved.

Cinematic sound provides an elevated listening experience. This system delivers dynamic, high quality sound including a SD card slot and Bluetooth® Connect.

LIGHT FOCUS STYLING

LEADING TODAY, DESIGNING TOMORROW

For the first time in design history, Light Focus options are available to fit your specific taste and preferences. Investing in state-of-the-art equipment should come with options. Whether you prefer a more classic look, a trendy design or even full customization with your business logo, Light Focus Custom Styling creates stunning visual appeal and continuity for your salon. Choose from Performance, Trend, Prismatic or Reflection styling to take your salon design to the next level of luxury.
