Casinos & Campus

Physical Security Solutions

CORE COMPETENCIES

GojaTech specializes in providing advanced technology solutions for electronic security systems. We create, implement, and maintain integrated security networks tailored for the nation's most essential facilities.

With our deep expertise, we prioritize outstanding customer support and ensure accurate, reliable delivery of all technical services.

As enterprises navigate an increasingly intricate landscape of physical and cyber threats, they must also contend with the rapid proliferation of smart devices. For mission-critical facilities operating around the clock, the stakes are high, and failure is not an option.

PAST PERFORMANCE

Microsoft Data Center

Project: Expansion Access Control Systems, Axis Surveillance Install, Bio Readers, Monitoring Stations & Network – South Hill Virginia

Peterson Air Force Base, Fort Sam Houston, Barksdale Air Force Base

Project: Installed Axis CCTV Surveillance System, Monitoring Stations & Network – Colorado Springs

Locations: Austin, TX & Fremont, CA

Projects: Upgrades and Maintenance Access Control and CCTV installs

Live Casino and Hotel-

Project: Full Install Hotel Surveillance System, Casino Maintenance and Installation Access Control, CCTV & Alarms

DIFFERENTIATORS

About Us:

Our team has the capability to manage, plan, and lead large technology-based security systems from setup through inception to closeout. With a strong emphasis on access control and surveillance, we possess the skill set to handle full-service contracts that require effective management, execution, and compliance. Our expertise ensures that your security infrastructure is robust, reliable, and tailored to meet your unique needs.
