

# Fuel Fix

---

21 February 2025

I purchased the so-called fuel saver, FUEL FIX, from Eugene with a fair amount of skepticism. While he explained its benefits in detail, I remained unconvinced.

I drive a 2014 VW Touareg 3.0TDI 4Motion, a vehicle not typically known for its fuel efficiency. Over the past two years, my average fuel consumption has consistently ranged between 8.9 and 9.1 L/100km. Given the car's weight and power, I considered that reasonable, especially since I fully utilize its performance.

However, after using FUEL FIX, I immediately noticed a significant increase in power. Now, after three full tanks, I can confidently say that my fuel consumption has dropped drastically. My new average is 7.9 L/100km—a remarkable improvement.

Thanks, Eugene, for the great advice! I'll definitely be purchasing FUEL FIX again.
