Letter of Recommendation

We at Zorora One Stop have been clients of Clean Fuel Technology for the past 10 Months – using their FUELFIX product at our Depot.

This product has exceeded all our expectations. Ever since we started using FUELFIX we have never had any issues with water or any other related contamination whatsoever and it has improved the quality of our product in every way.

At the same time keeping our bulk storage tanks clean of any rust or algae.

In all our years trading in the Diesel Industry we have never come across a product as effective as FUELFIX.

All of our clients – whom are from the Agri, Transport and Mining Industries have also experienced the difference that FUELFIX has brought about, such as increased performance, better consumption, less smoke and emissions and a notable and marked decrease in Diesel related breakdowns, to mention but a few.

We have also started reselling FUELFIX as the demand for the product has been so high that all our clients have proceeded to procure more of the product.

The service from Stefan le Roux and Clean Fuel Technology is simply excellent and we always receive our orders on time. They are constantly willing to go the extra mile!

We will without any hesitation recommend FUELFIX to any and all other Depots, Transporters, Miners and Diesel consumer customers in the Industry.

Regards,

Johan Neethling
