

STUVE GOLD CORP

ADVANCING HIGHLY PROSPECTIVE HISTORICAL MINERAL PROJECTS IN CHILE

INSPIRED BY THE PAST, FOCUSED ON THE FUTURE

STUVE Gold Corp. is a company whose name and opportunities are both drawn from the past, yet motivated for the future. STUVE Gold Corp. has selectively chosen Chilean based prospective mining projects that meet several elements of the following criteria:

- ✓ Historical mining operations
- ✓ High grade mineralized showings in high value Gold, Silver, Copper and/or Cobalt
- ✓ Drill ready accessible property
- ✓ Potential for near-term production

WHY CHILE?

Chile is the world's largest producer of Copper and has numerous mineral rich geological regions. Chile is considered one of the world's low-risk mining jurisdictions with a clear legal framework, a supportive government and administration as well as an abundance of available skills and labor.

THE GEOLOGY

Chile is home to some of the world's largest porphyry copper-molybdenum and copper-gold deposits such as Chuquicamata, Esperanza. The geological structure is the Upper Eocene – Pliocene Andean Mega Porphyry Copper Belt.

The Miocene El Indio belt has yielded deposits such as the Pascua Lama deposit (Proven + Probable Reserves; **17.9 million ounces of gold, 746.7 million ounces of silver and 659 million pounds of copper**) and the El Indio and Tambo Mines (**Past Production of 6.7 million ounces of gold, 51 million ounces silver and 1,980 million pounds of copper**).

As a world-class region, STUVE is focusing its efforts in Chile.

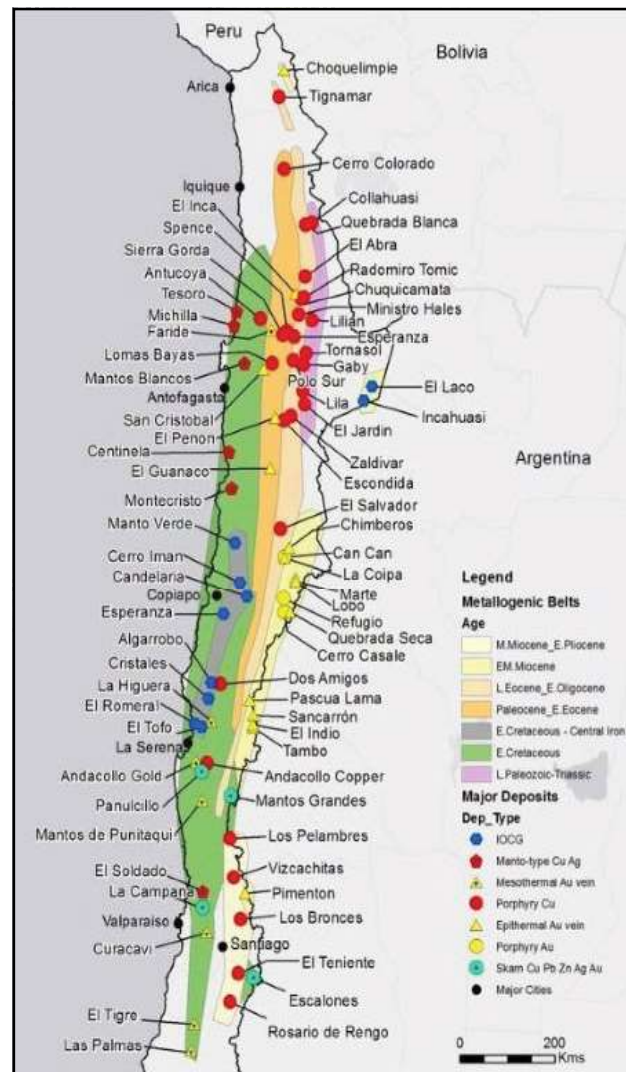

STUVE GOLD CORP PROPERTIES

STUVE Gold Corp has acquired rights to five project properties identified through its extensive knowledge and experience of its geological team. Stuve is advancing exploration with an eye to proving up significant development.

PROPERTY	NO. OF CLAIMS	SIZE (HECTARS)
COBA SW (incl Teresa)	5 Exploration 13 Exploration	1,260 Ha
INCA	17 Exploration	2,941 Ha
Santa Gra-	41 Exploration	11,500 Ha
ROMA	12 Exploration	3,500 Ha
EL Bosque	90 Exploration	25,800 Ha

STUVE Gold Corp. is applying its regional mining knowledge and modern mining technology to historical producing projects.

Sampling of mines in Chile

STUVE GOLD CORP

PROPERTIES:

COBA SW/TERESA PROPERTY

The Coba SW Property is located approximately 55 km north-northwest of Vallenar in the Atacama Region (Region III), Chile.

- 3 exploration claims and 13 exploitation claims totaling 1,200 hectares. 100% owned
- located within the Coastal IOCG (Iron Oxide Copper Gold) Belt
- Property hosts a continuous polymetallic vein with copper, gold and cobalt mineralization, confirmed through historic underground shafts and drifts on the property and recent drill program (Sept 2021).

INCA PROPERTY

The Inca Property is located 100km east of Copiapo in Region III.

- 17 Exploitation Claims, 2,941 Ha
- Located in the prolific Maricunga Gold Belt
- Previous work identified five mineralized zones. Current artisanal high-grade gold-silver mining in the SW "Ojos de Agua" alteration zone returned high grades of 72 - 290 g/t Au and 381 - 787 g/t Ag are reportedly being recovered.
- Close proximity to gold/copper porphyry deposits including Caspiche and Cerro Casale being developed by Barrack/Newmont

SANTA GARCIA PROPERTY

The 11,500 ha Santa Gracia Property located in the Coastal Cordillera of Region III, Chile, covers known or inferred extensions of 7 past producing high-grade Cu, Au and Co bearing veins systems.

ROMA

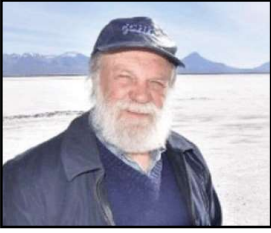

The 3,500 ha Roma Property, part of the Ovalle mining district within the Coastal IOCG/Porphyry Copper-Gold Belt. Prior drilling on the property yielded encouraging results.

EL Bosque

The 25,800 ha El Bosque Property is an early staged exploration property located in the Andean Cordillera of Region IV, Chile. Limited preliminary check sampling upstream from this 2.5 km² anomaly by STUVE returned values up to 0.61% Cu and 0.11 g/t Au, 38.9 g/t Ag

STUVE GOLD CORP

MANAGEMENT AND DIRECTORS

TERRY WALKER
CHIEF GEOLOGIST (DIRECTOR)

Terry Walker, is a highly-experienced geologist with over 53 years of international experience. Terry has spent over 25 years in Chile's mining industry and is well-connected throughout the sector.

He is the co-founder of GeoServicios Piedra Dorada – an exploration and development services company, focused on Latin America. He has acted as an independent consultant on project evaluation, generation and management in Chile for a variety of senior and junior companies. Prior to his work in Chile, Terry worked as a senior geologist for major and junior mining companies in Canada. Terry is a Qualified Person for the North American and Australian stock exchanges.

GORDON ALDCORN
PRESIDENT

Gordon Aldcorn is a 20 year veteran of the capital markets in advisory roles to a range of publicly listed companies. Includes Antares Minerals, a publicly listed Peruvian Copper exploration company that over 18 months rose from \$1.28 to over \$8.00 and was acquired by First Quantum Minerals for over \$460M.

AL J. KROONTJE
CEO (DIRECTOR)

JEFF GRAW
DIRECTOR

DALE BURSTALL
DIRECTOR

STEVE COCHRANE
DIRECTOR

JANA LILLIES
CONTROLLER

TERESA MINE PLAN

In September (2021) STUVE completed a 7 hole 1000m drill program to confirm the extension of the TERESA vein laterally and at depth (at 200m).

Based on the results below and mineralization to surface STUVE is undertaking a mineral extraction program through underground mining.

Hole	From	To	Width	Cu%	Au g/t	Ag g/t	Co%
COBA-21-01	92.6	98.71	6.11	2.5	4.45	28.9	0.56
including	93.25	97.72	4.47	2.9	5.37	34.4	0.61
COBA-21-04	100.3	115.0	14.7	1.96	2.46	5.6	0.10
including	106.38	113.7	7.32	3.42	4.98	9.7	0.12
COBA-21-07	174.49	179.2	4.71	1.4	5.27	2.4	0.35
including	174.9	178.5	3.6	1.72	6.66	2.7	0.45
