

OKLAHOMA GEOLOGIST JOBS AS OF MAY 1, 2025

As of May 1, 2025, several open geologist positions are available in Oklahoma, primarily in Oklahoma City, Tulsa, and other areas, with a focus on oil and gas, environmental, and hydrogeology roles. Below is a summary of available positions based on recent job listings from various sources:

1. Wellsite Geologist - Pinson Well Logging, Inc. (Oklahoma City, OK)

Description: Work on oil and gas drilling sites, analyzing rock cuttings, monitoring gas levels, and generating digital mudlogs. Involves daily communication with rig crews and supervising geologists from oil companies.

Requirements: Bachelor's degree in Geology or related field preferred, field experience is a plus but not mandatory.

Details: Immediate openings with additional positions expected in the coming months. Offers valuable field experience for career advancement in the oil and gas industry.

Salary: Not specified, but wellsite geologist salaries in Oklahoma City typically range from \$51k-\$103k annually.

2. Operations Geologist - Ascent Resources (Oklahoma City, OK)

Description: Involves integrating geologic, petrophysical, and geophysical data to support drilling operations, including well planning and geosteering.

Requirements: Bachelor's degree in Geology; experience level determines whether hired as Associate or Operations Geologist. 3-5 years of wellsite geology or mud logging experience preferred.

Details: Full-time position with a focus on unconventional resource plays.

3. Senior Geologist - Warwick Investment Group LLC (Oklahoma City, OK)

Description: Conduct research and analysis of regional geology and depositional environments, mentor junior geoscientists, and support acquisitions and joint ventures.

Requirements: Bachelor's degree in Geology, advanced degree preferred. Significant experience in oil and gas exploration and production.

Details: Strategic role with a focus on building operated positions through acquisitions and trades.

4. Field Geologist - StanTech LLC (Oklahoma City, OK)

Description: Perform environmental geology tasks, including field investigations and data collection for environmental assessments.

Requirements: Bachelor's degree in Geology or related field, entry-level to mid-level experience.

Details: Recently posted (active 3 days ago), suitable for motivated individuals looking to grow in environmental geology.

5. Mud Logger - MCWL Paladin Geological Services (Norman, OK)

Description: Responsible for on-site geology of the wellbore, including real-time data collection and communication with field teams.

Requirements: 3–5 years of wellsite geology or mud logging experience, clean driving record, and strong communication skills.

Details: Focused on Permian and Delaware Basins but applicable to Oklahoma operations.

6. Hydrogeologic Scientist - EPA National Student Services Contract (Ada, OK)

Description: Full-time position with the EPA's Office of Research and Development, focusing on hydrogeologic research and data analysis.

Requirements: Bachelor's degree in Geology, Hydrogeology, or related field. Entry-level position suitable for recent graduates.

Details: Immediate opening, ideal for those interested in environmental research.

7. Senior Geologist - Stratigrapher - Burns & McDonnell (Oklahoma City, OK)

Description: Conduct regional geologic research, mentor less experienced geoscientists, and support multi-disciplinary projects.

Requirements: Bachelor's degree in Geology, professional licensure preferred, and significant experience in stratigraphy.

Details: Involves travel and fieldwork, with a focus on environmental and energy projects.

8. Staff Exploration Geologist - Continental Resources, Inc. (Oklahoma City, OK)

Description: Focus on prospect generation and development in conventional and unconventional resource plays, integrating geologic models and advising operations geologists.

Requirements: Bachelor's degree in Geology, minimum 8 years of experience with an exploration and production company.

Details: Collaborative role in a multi-disciplined team, with a focus on active drilling programs.

Additional Notes:

Locations: Most positions are in Oklahoma City, with some in Tulsa, Norman, Ada, and Weatherford. Some roles may require travel or work in nearby basins (e.g., Permian/Delaware).

Salary Range: Geologist positions in Oklahoma typically range from \$51k–\$125k annually, depending on experience and role (e.g., entry-level vs. senior positions).

Other Roles: Related positions include Geological Technician/Analyst (Warwick Investment Group), Groundwater Modeler (Collier Consulting), and Environmental Geologist (Weston Solutions), which may also suit geologists.

Sources: Job listings were aggregated from Indeed, LinkedIn, ZipRecruiter, Glassdoor, and SimplyHired, with postings dated from October 2024 to April 2025.
