

Cheap Geology: using Linux, free software, and free data

a “Lunch-and-Learn” talk by Scott Schad

Friday, June 19, 2026
12:00 Noon - 2:00ish PM

The Oklahoma Well Log Library will host another “Lunch-and-Learn” session on Friday, June 19, 2026, in the library. Attendance is free and lunch will be served.

Our speaker, Scott Schad, is President of the Well Log Library and a petroleum geologist with 40+ years of experience.

In the first half, Scott will talk about the digital resources available on the web and at the library and the best way to use them. Our four dedicated Linux machines provide a portal into the MCGL well log and scout ticket database for the entire state of Oklahoma. They are easy to use and will accelerate your prospecting.

In the second half, Scott will talk about the free Linux operating system and software. If you have an aging laptop that’s not quite up to running the latest version of Windows, bring it to the talk. Scott will help you convert it to run Linux and to install the most useful software tools.

To reserve your spot, please email the library at:
