

NON NEGOTIABLE

• SKIN DISINFECTION • PATIENT SAFETY

NEW ERA OF SKIN DISINFECTION

Effective skin cleansing is arguably the most important aspect to deliver safe, effective aesthetic procedures, but there have been few meaningful developments in this field for many years until now.

CliniPrep is a ground-breaking technology which brings significant benefits over existing medical skin disinfectants and pre-procedure cleansers.

Ultimate skin disinfection:

- ✓ Bactericidal
- ✓ Fungicidal
- ✓ Virucidal
- ✓ Sporocidal
- ✓ Latest hypochlorous technology

Complete skin compatibility:

- ✓ Skin neutral pH
- ✓ Dermatologically tested
- ✓ No alcohol, parabens, fragrances
- ✓ Non-cytotoxic to re-growing skin

Additional feature benefits:

- ✓ Optimal hygiene and patient safety
- ✓ Provides ideal conditions for rapid skin recovery
- ✓ Not susceptible to antimicrobial resistance
- ✓ Non staining, stinging or irritating

CLINIPREP delivers a unique combination of greater protection against infection before, during and after aesthetic procedures, as well as far better skin compatibility than existing medical cleansers - providing an ideal environment for the skin to recover.

CLINIPREP has been comprehensively tested by independent laboratories to prove its efficacy and safety.

Proven skin safety:

- Non-toxic
- Non-irritant to eyes
- Non-irritant to skin
- Non cytotoxic

Highly effective antimicrobial cleansing:

- BS EN 1040
- BS EN 13727
- BS EN 1275
- BS EN 1650
- BS EN 1276
- BS EN 13704
