

Sewer System Installation Warranty (Northern Minnesota)

Contractor warrants that all sewer system installation work complies with the **Minnesota Plumbing Code**, local environmental health ordinances, and the specific standards required by **Roseau and Lake of the Woods County Environmental Services**.

This warranty covers proper installation of septic tanks, drain fields, connecting lines, and system components for a period of **one (1) year** from the date of system certification and final inspection.

Pumps installed as part of the system are covered under the **manufacturer's warranty for parts only**, typically for a period of **three (3) years**. This parts warranty is offered directly through the pump manufacturer or supplier and does **not** include any labor for diagnosis, removal, or replacement. Any labor associated with servicing or replacing pumps after the first year is the responsibility of the customer.

This warranty does **not cover**:

- Damage caused by misuse, neglect, or improper maintenance
- Failure to have the system pumped and maintained on a regular schedule
- Introduction of non-biodegradable or harmful materials into the system
- External damage due to flooding, vehicle traffic, digging, or other site activity
- Any changes made to the system or around the system by anyone other than Andrew J. Stoskopf Trucking, Inc. will void the 1 year warranty.

All warranty claims must be submitted in writing within the warranty period. Claims will be assessed, and any covered repairs will be performed at no cost to the customer during the first year unless the issue results from damage outside of the contractor's control.
