

# SMART APP CONTROL

MONITOR  
YOUR AIR  
AT ALL TIMES

CONTROL  
FROM  
ANYWHERE

## SMART MODE

BY USING SMART SENSORS, THE RPS-701 CONTINUOUSLY TESTS THE INDOOR AIR QUALITY AND AUTOMATICALLY ADJUSTS THE FAN SPEED TO MAINTAIN THE OPTIMAL CLEAN-AIR ENVIRONMENT

DON'T IGNORE  
YOUR HOME'S VERY  
REAL INDOOR AIR  
QUALITY PROBLEM.

## FACTS

- 1 In a single year, a 6-room house collects an **average of 40lbs** of dust which can be laced with up to 45 toxic chemicals
- 2 Asthma is the leading chronic disease in children accounting for 14.2 million doctor visits and 1.8 million emergency room visits each year
- 3 People spend nearly 90 percent of their time indoors where, according to the EPA, pollutants can be 2.5 times higher than outdoor levels.
- 4 You spend about 90% of your time indoors. Indoor environments can be 10 times more polluted than outdoor environments.
- 5 50% of all illnesses are caused by or exacerbated by polluted indoor air.
- 6 68% of human diseases are related to indoor air pollution (EPA)
- 7 There has been an alarming increase in the number of children with allergies and asthma. This has been linked to poor indoor air quality.
- 8 The EPA has ranked indoor air pollution among the top five environmental dangers.

Breathe Easier, Live  
Better & Longer!

## RPS-701 HEPA AIR PURIFICATION SYSTEM

REAL-TIME AIR QUALITY & OPERATIVE STATUS MONITORING

SMART MODE • 360° SUCTION • SMART APP CONTROL • SMART SENSORS

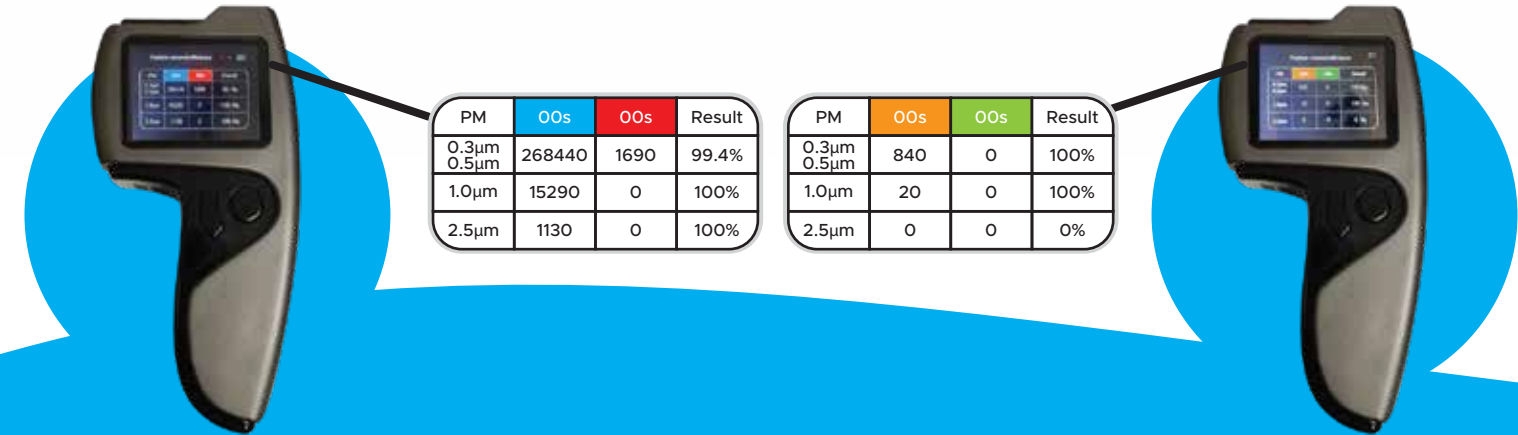

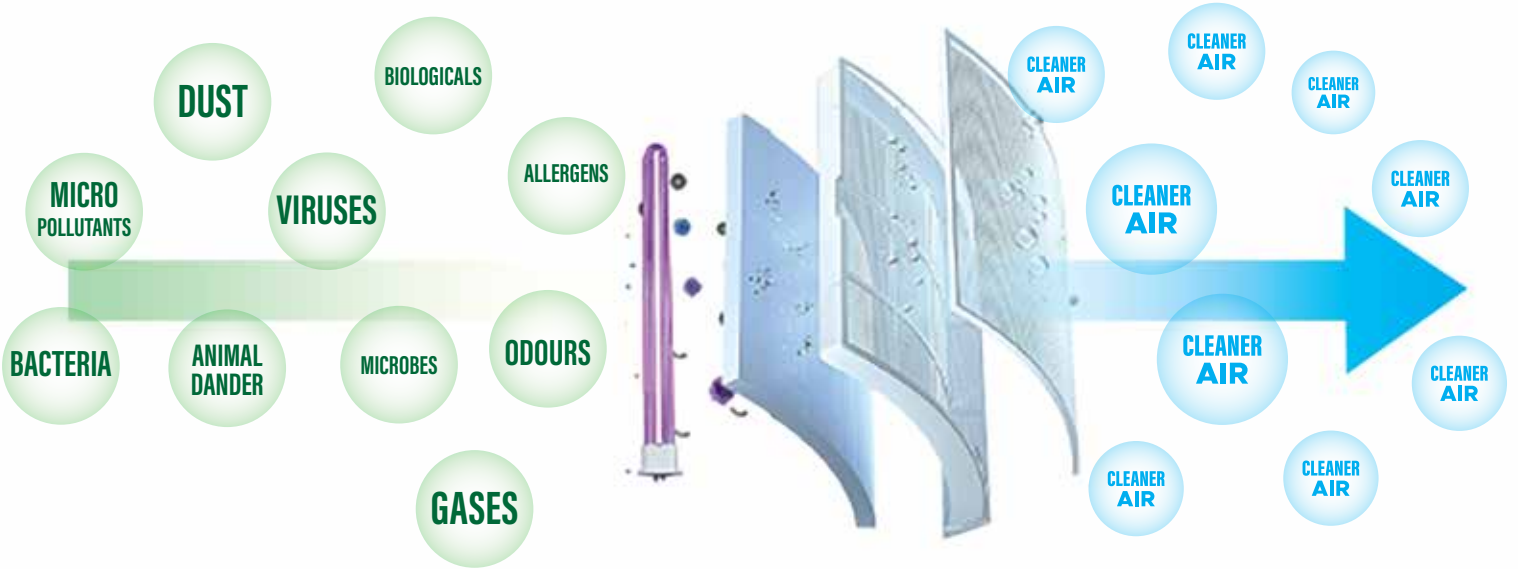

# RPS-701 HEPA

## AIR PURIFICATION SYSTEM

Smart sensors tell you the PM2.5 index, temperature and humidity inside in real time. The brightly coloured LED strip lets you know if your indoor air is fresh or unhealthy, every minute of the day.

# DESIGNED TO CAPTURE THE SMALLEST, MOST HARMFUL CONTAMINANTS... EVEN THOSE NOT VISIBLE.

The RPS-701 HEPA air purifier is designed to eliminate airborne microorganisms and remove particulates from your environment. It is designed with premium in mind, in its beautiful contemporary styling on the outside, and sophisticated air cleaning technology on the inside to captures the smallest, most harmful contaminants, even those you can't see. **IT'S WHAT YOU CAN'T SEE THAT CAN HURT YOU!**

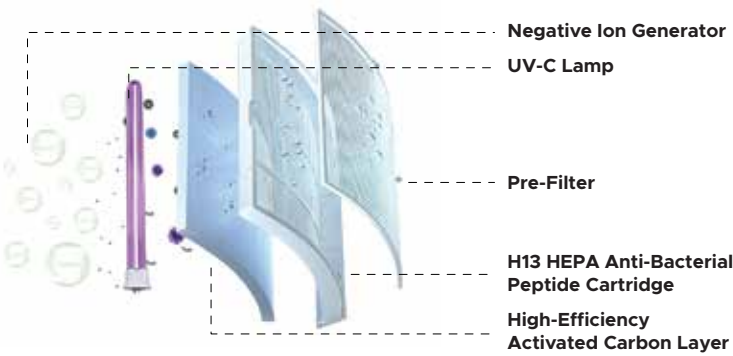

Clean your environment of pollen, fungi, bacteria, viruses, pet dander, ozone, chemicals and other harmful pollutants.

## BRING FRESH AIR INSIDE

The walls we use to shelter and protect us from the elements also trap airborne chemicals, gases, odours, bacteria and other pollutants. There is a study that suggests that our dwellings may contain air that is 2-5 times or even up to 100 times more polluted than outside air.

IT'S LIKE HAND SANITIZER FOR YOUR INDOOR AIR

# THE AIR IS PURIFIED IN 5 STAGES

- 1 Pre-Filter Stage**  
Consists of anti-bacterial fiber mesh fabric and sterilizing non-woven fabric in the shape of a bucket that can capture and filter large particles such as dirt, dust, hairs, and skin flakes from the air in 360 degrees.
- 2 H13 HEPA Anti Bacterial Cartridge**  
Utilizes high-density HEPA antibacterial cartridge that captures 99.99%\* of airborne allergens including pollen, mold spores, dust, pet dander, microbes, and smoke.
- 3 High-Efficiency Activated Carbon Layer**  
Offers our best odour protection against VOC's and household odours from cooking, pets, and smoke.
- 4 UV-C Lamp**  
24 watts of contaminant killing power that destroys airborne bacteria, mold, biologicals, fungi, viruses, and odours.
- 5 Negative Ion Generator**  
The negative ion generator makes indoor air feel more fresh, clean, and energized by releasing negatively charged air particles that attract and attach to mid-sized airborne allergens such as pollen, mold spores, bacteria, viruses, dust, pet dander, and cigarette smoke resulting in more purified, cleaner, and energized indoor air.
