

# How does the Whole-Home Water Conditioning System work?

The affordable, space efficient, all-in-one Whole Home Conditioning Unit automatically removes hardness minerals plus unsightly iron from your water supply. Your costly appliances, bathroom fixtures and plumbing will be protected; look better and last longer; laundry will be cleaner, softer and stain-free; bathing and grooming will be more enjoyable.

## Water Conditioning Process

As water flows through a **Soft Conditioner**, the calcium, magnesium and other hard water minerals are removed by ion exchange process, chlorine is also reduced and the water is once again as “soft” as its original form. In the Soft Plus Conditioner, in addition to hardness minerals, iron will also be reduced.

## Regeneration Process

When the **Soft Conditioner** becomes saturated with hard water minerals, the system goes automatically into cleaning mode. This is the process that washes the hard water minerals down the drain, making it ready to condition the water again and again.

CitySoft+

**When you look at all the benefits of iron free, conditioned water, you'll find that it makes a refreshing difference to your life and will save you money now and in the years to come.**

**\* Shiny hair, soft skin \* Sparkling fixtures \***  
**\* Spotless dishes \* Softer fabrics \***  
**\* Fluffier laundry \* Less chemicals, less money**

## **Want to improve your life without all the work?**

It's easy with a water conditioner installed in your home. Hard water can cause more work for you than you may realize. Scale, hard water minerals and soap scum are left behind once water goes down the drain. There are so many ways to see the immediate benefits in your home.

### **Make more time for yourself**

- Preventing scale build-up on sinks, showers, tile and floors means less time spent on household cleaning
- No need to wash away spots on glassware, dishes and cutlery left behind from the dishwasher

### **Looking your best becomes easy**

- Clothing lasts longer and is softer and brighter without the hard water residue left in fabrics
- Shampoos produce a soft, sudsy lather leaving hair shiny and clean
- Skin is no longer dry and itchy from soap residue but soft and glowing

### **Protect your investments**

- Conditioned water prevents scale build up on pipes and water heaters, saving you money on heating bills
- No need to replace water-using appliances such as your dishwasher, washing machine, coffee maker and kettle due to hard water scale

## **The many benefits a SOFT+ conditioner can make to your home...**

The affordable, space efficient, all-in-one Whole Home Conditioning Unit automatically removes hardness minerals plus unsightly iron from your water supply. Your costly appliances, bathroom fixtures and plumbing will be protected; look better and last longer; laundry will be cleaner, softer and stain-free; bathing and grooming will be more enjoyable.
