CENTRAL WHOLE HOME HEPA & UV SYSTEM

800 SQ.FT

6,400 cubic sq.ft per house
31 minutes to clean the air
46 clean cycles per day
18,250 clean cycles per year

1,000 SQ.FT

8,000 cubic sq.ft per house
39 minutes to clean the air
37 clean cycles per day
14,600 clean cycles per year

1,200 SQ.FT

9,600 cubic sq.ft per house
47 minutes to clean the air
25 clean cycles per day
9,855 clean cycles per year

1,500 SQ.FT

12,000 cubic sq.ft per house
58 minutes to clean the air
25 clean cycles per day
9,855 clean cycles per year

2,000 SQ.FT

16,000 cubic sq.ft per house
78 minutes to clean the air
19 clean cycles per day
7,300 clean cycles per year

2,500 SQ.FT

20,000 cubic sq.ft per house
97 minutes to clean the air
15 clean cycles per day
5,840 clean cycles per year

3,000 SQ.FT

24,000 cubic sq.ft per house
117 minutes to clean the air
12 clean cycles per day
4,745 clean cycles per year

The Central Photo Catalyst UV System Oxidize airborne household contaminants such as bacteria, viruses, mold etc. into simple water vapor and carbon dioxide leaving your home fresh and clean.

micro-science air cleansing

RespirAide

6-Phase System...how it works:

- 1 Large, visible pollutants are captured by the Antibiological Pre-Filter.
- 2 Particles smaller than .05 micron (allergens, microbes) are positively charged (+) by the Electrostatic Precipitator. The charged micro-particles are then electronically attracted to the negatively charged collection plates (-).
- 3 Volatile Gases & Compounds (VOC's) are neutralized by the Charcoal Gas Filter.
- 4 The powerful Germicidal UV Light kills viruses by interrupting their DNA.
- 5 The Photo Catalyst and the UV Light cause photo-chemical reactions that sterilizes the air by oxidizing remaining pathogens in the Virus Kill Chamber.
- 6 The Negative Ion Generator creates beneficial negative ions that accompany the cleansed air dispersed into your indoor environment.
