RECENTLY, I went to purchase some stuff from a famous food outlet's franchise at Giddu Chowk in Hyderabad. I was charged

little or no gas pressure. About six months ago, I heaved a sigh of relief on noticing that the work on the

## Stress in educational institutions and campuses

Stress in educational institutions is alarming. It is happening in even more alarming ways. The number of teenagers doing drugs on campus is increasing as it is worrisome, and there is no doubt to continue to live in denial. We must wake up and do something about it before it becomes a habit. The first step towards doing something is to understand the reality and then try to understand what is causing it. Children of today are extremely stressed about their studies and careers. They live under constant pressure, and are afraid of lagging behind in a tough, competitive world.

## Class V Science Live Activity on Seed Structure!

Our Class V students had an incredible hands-on experience exploring the structure of seeds in a live science activity. They dissected seeds, examined their parts, and learned about how plants grow from these tiny marvels of nature.

It's inspiring to see their curiosity and excitement about the natural world! Great job, young botanists!

Presentation on  
Photosynthesis!

Our Class VI students recently dazzled us with an insightful presentation on photosynthesis. They explained how plants convert sunlight into energy, demonstrating their knowledge with engaging visuals and clear explanations. Amazing work, young scientists! Keep shining and growing just like the plants you study! 🌿☀️

**Assembly Presentation in Morning. It's a wonderful opportunity to celebrate student's hard work and dedication.**
