

THE 5 THINGS

YOU SHOULD KNOW ABOUT ENTERPRISE DEVICE MANAGEMENT (EDM)

Brought to you by HP and Intel®

As IT's time continues to become stretched, as a service adoption continues to grow. EDM is the latest of these models, but what is it, and is it right for your business?

Our EDM Partners

1 WHAT IS IT?

Enterprise Device Management (EDM) manages your endpoint devices throughout their entire lifecycle

EDM can be custom-built to include all the services needed to keep your users performing at their best

2 WHY USE IT?

Zero touch
Focus on your core business while we take care of your endpoint devices

Secure
High-level protection with all updates and patches applied

Fast
Users receive the right devices quickly, and ready for business

3 HOW DOES IT WORK?

Request device via a custom portal

Deploy via vendor agnostic system

Remove expired asset for deployment or disposal

Refresh, deploy and remove

Procure device, with ease of purchase

Manage with remote monitoring and 24x7 customer support

Redeploy device after clean, test, refurbish, upgrade and reload

Dispose of data to CESG IA5 DoD 5220.22-m standards

Our vendor agnostic system can output 5,000 enterprise and/or end user devices per week.

4 THE BUSINESS OUTCOMES

Increased agility & flexibility

Productivity gains

Predictable OpEx

5 WHY US?

Consulting and professional services for the best in EDM

Endpoint protection that meets ASD4 for peace of mind

Multi-vendor certification with a team of certified engineers
