WHY ASSET MANAGEMENT?

IT asset management (also known as ITAM) ensures that a company's devices are tracked, maintained, stored, upgraded, and eventually disposed of.

This process maximises the value your company can generate from your devices. Our experts can equip your team with the tools that best fit their needs while maintaining the flexibility required to adapt to changing business requirements.

Astrontech offers a fully-managed IT asset service for your device fleet. We capture and track asset details for newly deployed and existing devices, storing them safely, imaging them with SOE and cleaning or upgrading them. We can deploy devices anywhere around Australia and collect and manage the end of life process for equipment — safely disposing and wiping them of all data.

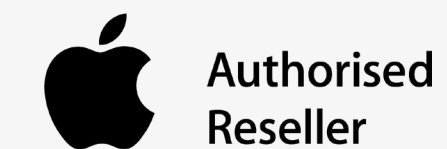

ABOUT ASTRONTECH

Founded in 1999, Astron Technology Pty Ltd provides systems integration and IT services for small and medium-sized enterprises, corporations and government organisations. We pride ourselves on our professional expertise, incredible support services, and long-term client relationships.

Our team has set the standard in developing flexible and innovative solutions for clients as their businesses grow and their operational needs evolve and change. We work as a close partner with your team, understanding your business processes, systems, and goals to develop the best strategies that will meet your needs and support you well into the future.

We invest in our vendor partnerships at the highest level to provide our customers with specialist technical expertise and highly competitive pricing.

THE KEY BENEFITS OF ASSET MANAGEMENT FOR YOUR BUSINESS

Decrease internal IT team workload

Free up your internal security resources to focus on core business priorities.

Improve user productivity

Get users up and running quickly with comprehensive delivery, unpacking and removal processes.

Strengthen your security profile

Proactively identify enhancements that optimise your company's endpoint security.

Provide a one stop partner

You'll have access to a team of experts available during extended working hours to support your IT needs.

Achieve predictable costs of your device fleet

Use unique analytics and data to build a complete view of your IT asset landscape and plan for the future.

SOLUTIONS FOR EVERY STAGE OF THE WORKSPACE LIFECYCLE

Discover and design

Our expert advisory services ensure you get the most from your IT investments.

- You'll understand your overall security posture compared to industry best practices.
- We'll identify any organisational threat vectors and risks and outdated software, missing patches or misconfigurations.
- We'll support you to align your existing security practices with current industry standards.

Configure

Receive your devices expertly configured and ready to use straight out of the box.

- We'll ensure devices reflect the latest configuration before deployment.
- We'll ensure devices are dynamically configured and personalised for each user.
- We'll integrate and package customer specified hardware components, collateral and accessories with new PCs.

Deploy

Let us take care of the delivery, staging, installation and setup of all your devices.

- We'll present you with flexible delivery options so you can get your users up and running as quickly as possible — even to rural or remote offices.
- We'll tailor a custom installation and setup service to your organisation.
- We'll facilitate migrating data from your existing devices to new ones.

Maintain

Get support and organise repairs or replacements either in the workplace or on the road.

- We'll provide remote assistance and onsite support for your hardware.
- You'll have access to services to safeguard your hardware against accidental damages, loss of equipment or loss of sensitive data.
- We'll extend your hardware warranty an additional year and provide you with premium post-warranty support.

Optimise

We'll improve your user productivity and IT manageability.

- You'll have real-time malware protection, threat analytics, reports, and insight and expertise to strengthen your security position.
- We'll provide you with insightful analytics and reports to identify potential hardware or software issues.
- You'll have access to certified technicians during extended working hours to resolve IT issues.

Recover and renew

When your devices reach end-of-use, we'll organise their recovery and repurposing or recycling.

- We'll repurpose end-of-use devices and provide any residual value back to you.
- You'll have access to a custom service to remove devices, monitors and accessories from work areas.
- We'll erase all information from retired devices using an industry-standard process.
