

MINI-405 PORTABLE MOISTURE TESTER

High-frequency portable moisture tester that measures grain moisture deep into the kernel. Designed for accuracy, speed, and mobility — the Mini-405 brings professional-grade grain testing right to the field.

Suitable for all grains published by the Canadian Grain Commission (CGC) and the United States Department of Agriculture (USDA).

Moisture Measurement Specifications

- Moisture Repeatability: $\pm 0.3\%$
- Moisture Resolution: 0.1%
- Grain Temperature Range: -10°C to 66°C (14°F to 150°F)
- Measurement Principle: Capacitance Sampling
- Sample Volume: 23 in³

Special Features

Touchscreen:

4.3" color capacitive display with intuitive interface for quick navigation and crop selection.

Wi-Fi Connectivity:

Receive software and crop calibration updates automatically from anywhere.

Scale Calibration:

Includes a 200 g weight to ensure precise and repeatable measurements.

Favourite Crops:

Select up to 8 favourites to appear on the main screen for faster access.

Carrying Case:

Includes protective foam-lined case for safe transport in the field or truck.

Mobile Application:

Connect via the MA-405 App (Android / iOS) to save, view, and share up to 500 results instantly.

Technical Specifications

Parameter	Details
Dimensions	9.5 in \times 5.5 in \times 10 in
Weight	1.7 kg
Load Capacity	4 kg
Power Source	2 \times 18650 Lithium-Ion Battery
Operating Time	5 hours continuous use
Charger	5 V 3 A
Operational Conditions	5 $^{\circ}\text{C}$ – 35 $^{\circ}\text{C}$ (40 $^{\circ}\text{F}$ – 90 $^{\circ}\text{F}$)
Storage Conditions	Room temperature
Mobile Application	iOS & Android compatible

Supported Crops

Includes all CGC / USDA crop calibrations such as: Barley • Canola • Corn (High / Low Moisture) • Soybeans • Wheat (All Types) • Oats • Peas • Lentils • Mustard • Flaxseed • Rye • Sunflower • Triticale • Beans • Chickpeas • Rice • Hemp • Buckwheat and more

Benefits

- Portable and lightweight — perfect for field use beside the combine or auger
- Accurate grain sampling with rapid results
- Long battery life for extended operation
- Built-in thermometer and test-weight function
- Connect, store, and share results wirelessly
- Manufactured in Canada
