

GrainSense Go Protein Analyzer

Protein analysis in the palm of your hand

Anywhere
Instantly

Key Features

- Portable, Battery-Powered NIR Analysis**
A compact handheld device using advanced near-infrared technology for on-the-go testing. Available calibrations include: wheat, canola, oats, barley, corn, soybean, and soybean meal.
- Lab-Grade Measurements in Seconds**
Instantly measures protein, moisture, oil, and carbohydrate content from just a few kernels.
- Minimal Sample Requirement**
Requires only ~3 grams of grain—no grinding or prep needed.
- Cloud-Connected Data**
Automatically stores results with GPS coordinates in the GrainSense cloud for easy tracking and better decision-making.
- All-Inclusive Kit**
Includes the analyzer, measuring spoon, glass-free tray, carrying bag, 6 AA batteries, cleaning cloth, and quick start guide.

Key Benefits

-  **Make Informed Harvest Decisions**
Optimize harvest timing, storage strategies, and load segregation using real-time quality data.
-  **Boost Margins with Grain Segregation**
Canadian users have reported up to \$22,000 in added annual profit by using protein data to separate and market high-quality grain.
-  **Instant Field Decisions**
Test grain quality during harvest, storage, or before heading to market—no lab required.
-  **Simple, Worry-Free Maintenance**
Stay up to date with automatic cloud-based calibrations and software updates — no service appointments needed.
