

Flying Lead Parking Stand

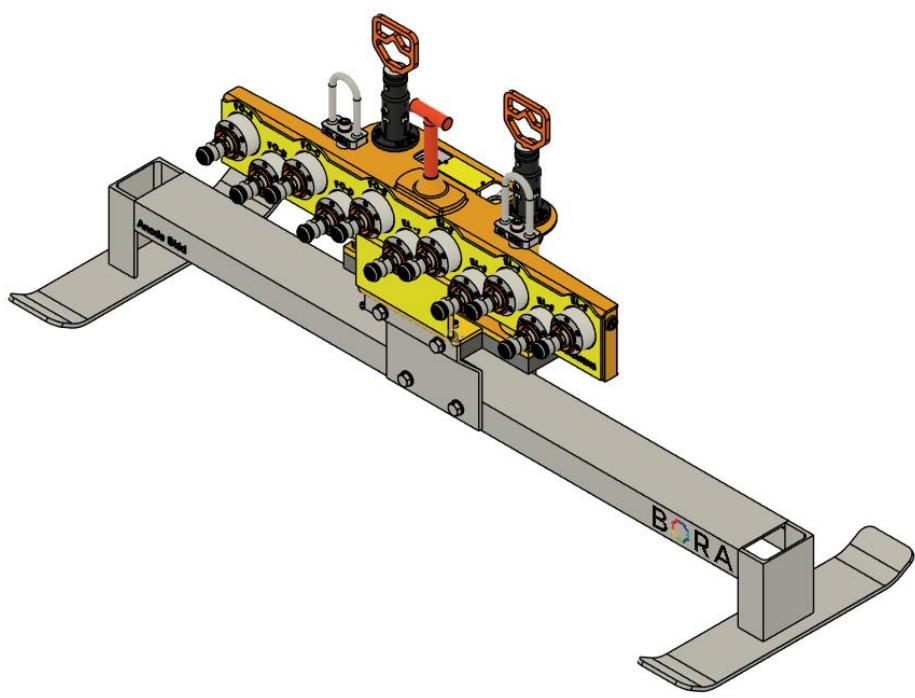

Product Specification Sheet

Description

This flying lead parking stand integrates an 11-way REDU (Retrievable Electrical Distribution Unit) from DigiTRON with a solid frame suitable for subsea applications. This solution enables subsea cable distribution, simplifying a complex network.

Number of connection ports can be varied per client's application.

Key Specifications

Length
2025 mm

Width
700 mm

Height
979.5 mm

Weight in Air
200 kg

Weight in Water
230 kg

Connection Points
11

Additional Points

- Main Structure - S355 Type Steel
- Painted Yellow (RAL 1004) Norsok M-501, System 1
