# Experience that speaks for itself:

With dozens of projects delivered and the trust of our clients, we continue to innovate and improve our services to deliver results that delight.

## About Us

J&R Affordable Interiors was founded with the mission of transforming spaces through the combination of sophisticated design, thoughtful functionality, and service excellence. Specializing in flooring and other materials such as vinyl, tile, stone, and more, we provide complete, customized solutions for residential and commercial clients throughout Florida and beyond.

At the heart of J&R Affordable Interiors is a team of passionate professionals, including flooring specialists, who are dedicated to delivering exceptional results.

***“Our goal is to provide our clients with the finest flooring by combining global expertise with reliable service.” – J&R***

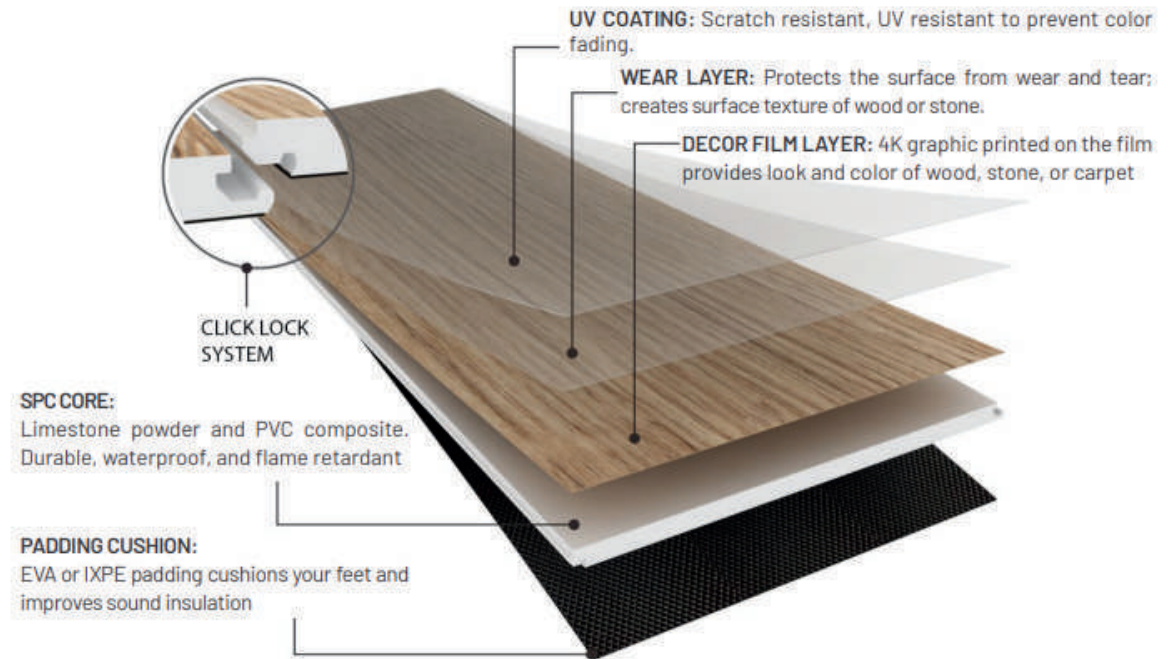

# Technology and beauty that transform environments.

SPC (Stone Plastic Composite) flooring **is the number one choice for modern projects.** Made from an ultra-resistant base of limestone (calcium carbonate) and PVC, it far outperforms traditional flooring.

With a sophisticated look and unbeatable performance, SPC offers everything you're looking for: **100% waterproof, flame retardant, non-slip, phthalate-free, scratch and warp resistant**, as well as being super easy to install.

More safety, more durability and much more style for your environments.

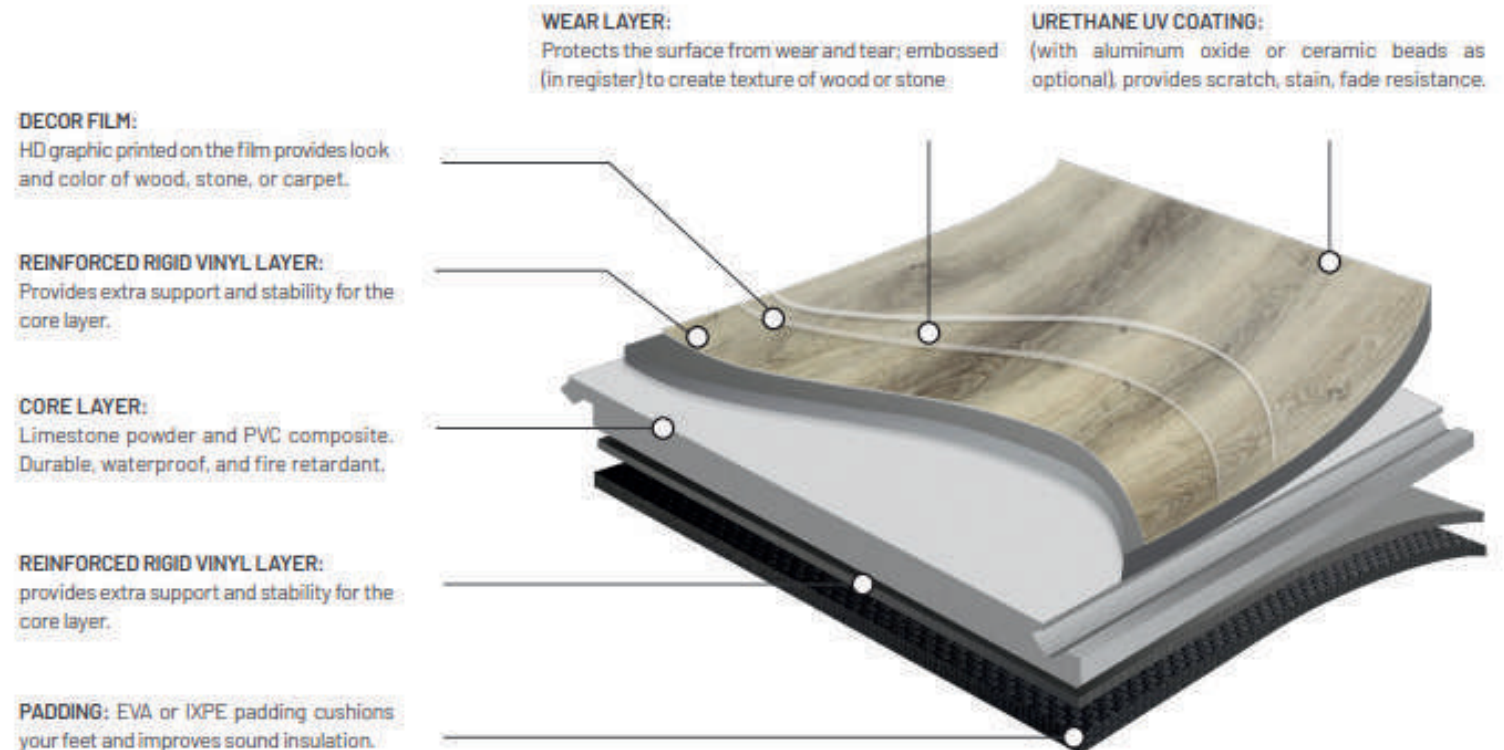

## SPC Co-Extrusion: **More comfort, more beauty, more technology.**

SPC flooring with Co-Extrusion technology (ABA structure) is the evolution your environment deserves. With additional layers of reinforced core, **it offers superior dimensional stability, more walking comfort and improved acoustic insulation** - ideal for those seeking peace of mind and quality of life.

In addition to the technical performance, the look also impresses: the more aesthetic core and the ultra-realistic finishes with **EIR (Embossed in Register)** texture guarantee a sophisticated and natural appearance in every detail.

**More innovation, more elegance and much more well-being with every step.**
