History of our company

PT CDM Indonesia Jaya

This year

- ✓ DRAM & LCAM (2 projects)
- ✓ Article 6.4 (one project)
- ✓ Carbon Footprint (two projects)
- ✓ Carbon Footprint for KRL Jabodetabek and Whoosh
- ✓ ESG (one project).

2023

Actively involved in consulting activities for sustainability programs, including the certification of greenhouse gas (GHG) emission reductions (SPE-GRK)

2013

- CDM terminated.
- Actively involved in Joint Crediting Mechanism (JCM) projects, serving as a supporting auditor for JQA.
- Five PDDs were registered under the UNFCCC.

2008

Actively engaged in promoting potential projects for greenhouse gas emission reductions through the Clean Development Mechanism (CDM) scheme

Our Vision and Mission

Our Vision

To become Indonesia's leading carbon consulting company, driving the transition toward low-emission development through professional services, strong integrity, and continuous innovation across national and international emission-reduction mechanisms

Our Mission

Our mission is to provide credible, science-based consulting services that enable the development of high-quality emission-reduction projects under JCM, Article 6, and other international carbon mechanisms. We support public and private partners through PDD development, MRV, sustainability certification, and strategic decarbonization services that meet global standards.

We are committed to accelerating Indonesia's transition toward a low-emission future by promoting innovation, strengthening institutional capacity, and fostering collaboration with international verification bodies and climate-focused organizations to deliver measurable environmental and economic impact.

report making or training
- ***DRAM/LCAM/PDD making***
report making or training

We proudly support SERD in achieving final-stage GHG certification for the Rantau Dedap Geothermal Power Plant — one of Indonesia's largest clean-energy emission-reduction initiatives.

This milestone strengthens Indonesia's transition to low-carbon energy through verified, high-integrity climate action.

The biggest GHG emission reduction potential in the energy field in Indonesia is 3.5 million tCO₂e

Current Year Activity -

Carbon certification

Together with Pertamina Power, Marubeni, and Sojitz, we are moving forward to certify climate mitigation actions at Jawa Satu Power , the largest gas-fired power plant in Southeast Asia and a true symbol of the clean energy transition

the moment

my team

Carbon certification

With Article 6.4, carbon certification for the Semangka Hydropower Plant enters a new era—extending the project beyond its completed CDM cycle and positioning it at the forefront of Indonesia's next-generation climate action.

This Year's Achievement - Carbon footprint

07

Total Penggunaan **Emisi Carbon**

Hal ini menunjukkan bahwa Commuter Line Jabodetabek menghasilkan emisi 4–7 kali lebih rendah daripada kendaraan konvensional.

Sumber : Riset BRIN

Empowering KRL Jabodetabek and KCIC Whoosh with carbon footprint assessments, accelerating Indonesia's move toward sustainable, low-carbon transportation.

Empowering **Sustainable Competitiveness**
for **Long Term Value Creation**

2025

Interim Report

LAPORAN KEBERLANJUTAN
**SUSTAINABILITY
REPORT**

Developing a comprehensive ESG report to support MCCI's preparation for its upcoming IPO, ensuring strong sustainability alignment and investor-ready transparency
