Say NO to Manual Cleaning

1 Trained Operators, Latest Technology & Highest Safety

- ✓ We follow World Health Organization (WHO) recommended cleaning process.
- ✓ Our cleaning operators are fully trained and professional experts.
- ✓ They use safety rope, masks, gloves, boots, helmet, lights etc safety gears.
- ✓ They use latest tools and equipment with highest caution and safety.

2 One-Stop Commercial, Industrial, Factory & Residential Solutions

- ✓ Discounted rates, international quality service & all cleaning solutions.
- ✓ Water Tanks & Pipelines disinfection, cleaning and automation.
- √ Floor Tiles, Office & Common Space, Kitchen, Swimming Pool, AC cleaning.
- √ Window Glass, Building Walls Cleaning & Painting + IP Cameras Installation

We Use Hydrogen Per Oxide which works as Oxidizer and Antiseptic

- ✓ Hydrogen peroxide is used as an oxidizer, bleaching agent, and antiseptic.
- ✓ It's used in certain waste-water treatment processes to remove organic impurities.
- ✓ Hydrogen peroxide is used for the sterilization of various surfaces.

4 Ultra-Violet Ray Treatment to Kill Bacteria & Viruses

- ✓ Ultraviolet (UV) light has been used to disinfect water for more than 75 years.
- ✓ It disinfects water without the use of chemicals.
- ✓ UV light kills bacteria, viruses, and some cysts.
- ✓ The light is at a specific wavelength, capable of killing common bacteria.
- ✓ The system adds nothing to the water, produces no tastes or odors completely safe.

Certification of Cleaning using Latest Technology

- ✓ We provide certificate of routine cleaning using latest technology and process.
- ✓ The certificate also helps you impress your
 foreign clients showing the high standards.
- ✓ This certificate is a great addition to your reputation, image, and high standards.
- ✓ Our commercial clients love it!

Importance of Tank Cleaning

WHY IS WATER TANK CLEANING SO IMPORTANT

Important for health

Clean water prevents disease outbreaks. Some common health problems that arise due to impure water include dysentery, cholera and gastroenteritis.

Reduces maintenance costs

If a tank is maintained regularly, it saves time, effort and money. There are less chances of the tank structure or the associated water systems being damaged.

Essential for tank maintenance

Regular cleaning prevents buildup of sediment and silt and reduces the probability of rusting and corrosion which could deteriorate tank structure.

Prevents plumbing issues

Regular cleaning prevents build up of impurities which could lead to plumbing issues in the valves and pipes that supply the water to a building

10 Step Cleaning Solution

Arrival of Team, Inspection of Tanks and action plan formulation.

The area surrounding the tank and top of the tank is cleaned.

Removing harmful gases from the water tank using exhaust fan.

Water is drained out of tank using powerful submersible pump.

Scrubbing is done to remove the dirt, sediments, fungus & stains.

Applying Hydrogen Peroxide across the tank which works as a bleaching agent, oxidizer and antiseptic for disinfection. This is safer and better cleaning agent than harmful bleaching powder.

10 Step Cleaning Solution

7

Walls & floor of tanks are deep cleaned using high-pressure water jet

8

Sludge are drained out from the tank using a vacuum sludge pump.

ğ

Using Ultraviolet light to kill bacteria in the last turn.

10

Completion of cleaning with customer feedback and satisfaction.

We are Ready to Serve You Year-Round!
