

**1** Reset the router,  
by turning it off  
(Wait 1 Minute)

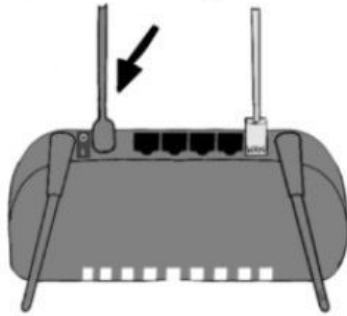

**2**

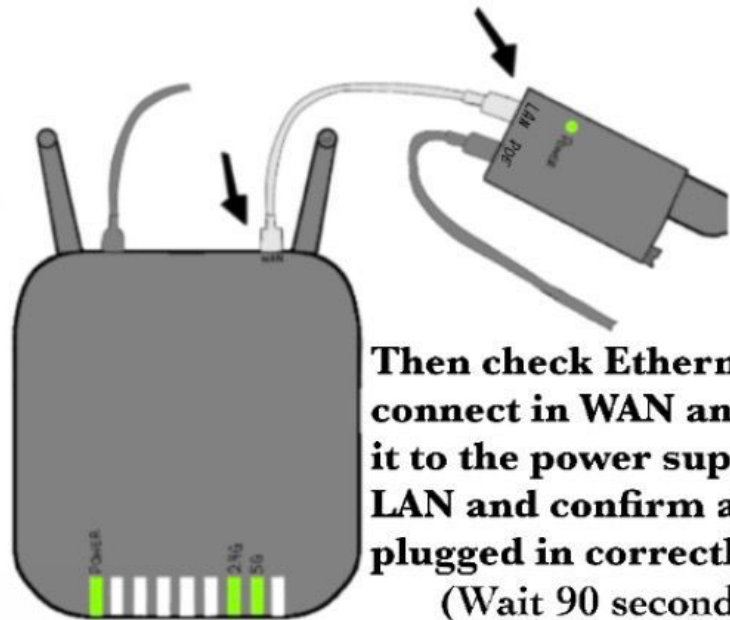

Three light should show.  
(Power, 2.4G, 5G)

If not, continue the steps

**3** Check the power cord

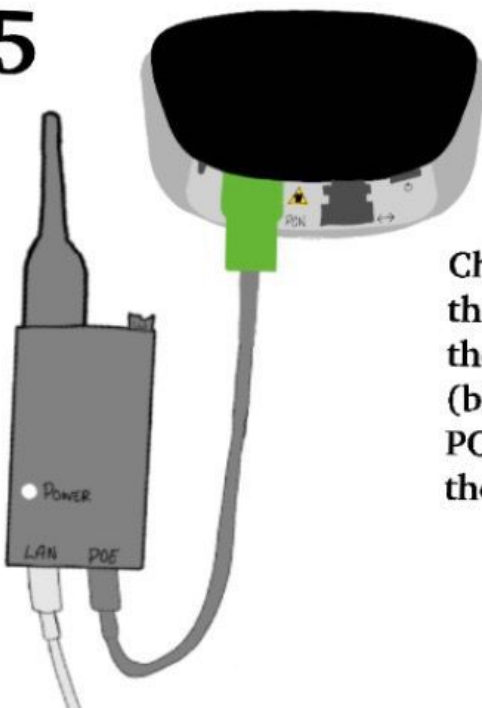

**4**

Then check Ethernet cable  
connect in WAN and follow  
it to the power supply in  
LAN and confirm all are  
plugged in correctly.  
(Wait 90 seconds)

**5**

Check the power supply, first  
the power cable, second check  
the POE cable back to the CPE  
(black square box) makes sure  
POE cable is secure in to both  
the power supply and CPE
