

Community drinking water supply project in Bangang (Cameroon)

Location: Nzong

Context: Nzong is one of the famous areas in the village Bangang. The majority of homes do not have tap water in houses.

Goals :

- Improve access to drinking water for about 500 inhabitants of the 5 villages
- Improve the hygiene and health conditions of the villagers

Nature of the investment:

- Catchment and reservoir works
- Realization of the pipeline network
- Connection of 9 standpipes and construction of 8 other standpipes
- Establishment of a Water Management Committee
- Hygiene awareness

Budget: 10.000.000 frs CFA which is £13,000
