

# **“Electrical Safety and Overcurrent Protection”**

## **-by Brian Lewis Field Applications Engineer Eaton Bussmann**

### **Brian Lewis**

Brian Lewis is a Field Applications Engineer with the Bussmann Division of Eaton. Brian provides technical assistance to Consulting Engineers, OEM's, Electrical Contractors, Industrial End Users and Electrical Inspectors on the Design, Development and application of Overcurrent Protection and Electrical Safety.

#### **Background**

Brian Lewis has been with Eaton since 2019 and specializes in training on the design and application of Overcurrent Protective Devices and Equipment in Electrical Distribution systems in accordance with the National Electrical Code (NEC®) and equipment in accordance with the various product standards.

Brian participates in IEEE, NEC and IAEI activities.
