

Brivo Feature Packs

Easily Create Security Your Way, On Your Time

Simply mix and match to create your Brivo Security Suite to match your needs

Feature Packs

Enhanced Access

Enhance your monitoring and control capabilities. Strengthen your access control with more visual aids, extended controls and advanced management.

Enhanced Reporting

Gain advanced reporting and tracking to be more informed, in compliance with policy or regulations, and make data-driven decisions. Data Explorer redefines the reporting experience by tracking key metrics from complex reports and empowering deep dives into physical access-related data. Data is presented in a range of formats: graphs, tables, etc to easily derive and make sense of the data.

Enhanced Video

Integrating video intelligence into your access events delivers a single complete security view with relevant rich context and evidence. Navigate with ease. The instant correlation of video and access events helps you accurately verify incidents, respond faster and keep your buildings safer.
