

SOCIAL WEALTH FRAMEWORK

Reveal group dynamics. Strengthen culture. Lead with clarity.

WHAT IS SOCIAL WEALTH?

The Social Wealth Framework is a behavior-based model built on the Social Wealth Inventory™, a research-backed assessment that reveals how people build trust, stay engaged, and navigate tension in group settings. It helps individuals and organizations understand their role in human systems and make practical shifts that build social wealth—the trust, relationships, and shared purpose that enable groups to thrive.

CORE PRINCIPLES OF THE SOCIAL WEALTH FRAMEWORK

Belonging Is Built

Belonging grows through intentional design, not assumption.

Behavior Is Patterned

People's actions reflect the systems they're part of.

Culture Is Dynamic

Culture evolves when we respond to real experiences.

OUR SERVICES

Individual and Team Assessments

Individuals receive a Social Wealth Profile, and teams gain a synthesis of patterns that shape group dynamics.

Insights Reporting and Culture Mapping

We deliver reports that highlight strengths, challenges, and behavioral trends within your organization.

Leadership and Strategy Sessions

We help leaders apply insights to improve trust, alignment, and adaptive decision-making.

Facilitated Processes and Workshops

We guide teams through inclusive, participatory sessions that strengthen connection and shift culture.
