

BC CDC Immunization Manual

As a community, we would like to ensure that all BC residents are aware of the risks and benefits of the COVID-19 vaccine as per the BC Centre for Disease Control Immunization Manual:

BC CDC Immunization Manual - Informed Content

<https://qrco.de/bccdcmanual>

Am I Vaccine Injured?

In case of a vaccine injury or adverse event, the medical provider is obliged to report it to authorities as per the BC CDC and BC *Public Health Act*.

Submit an Adverse Event Following Immunization (AEFI) Reporting Form

<https://qrco.de/bccdcform>

You, as the patient, can report your own vaccine injury or adverse event to CAERS.

Canadian Adverse Event Reporting System
www.caers.info

An independent reporting system created by Canadians, for Canadians.

Informed Consent is an essential precondition to providing immunization. It is the professional and legal responsibility of the provider to obtain **Informed Consent** prior to immunization.

The **Informed Consent** process involves:

- Providing all relevant information to the patient/client
- Ensuring all known risk and adverse event information is understood by the patient/client
- Voluntarily agreeing to participate

Risks vs. Benefits Covid-19 vaccine for Pregnant and Breastfeeding women

No clinical trials with pregnant and breastfeeding women were conducted and none finalized to date, hence no safety data is available for this group of patients.

Pfizer's Post-Authorization of Adverse Event Reports summarizes 270 mother case outcomes of pregnant women who received the BNT162b2 vaccine between 01Dec2020 to 28Feb2021 (page 12).

SCAN ME

- Of the 270 mother cases,
- 238 with 'no outcome'
 - 5 with 'pending outcome'
 - 28 DEATHS from 29 revealed outcomes

Risks vs. Benefits of Covid-19 Vaccines

On March 1, 2022, by court order, the FDA released the *Pfizer Post-Authorization of Adverse Event Reports* document, representing the initial three (3) months of the COVID-19 vaccine rollout from 01-Dec-2020 to 28-Feb-2021. The following summarizes the outcomes of the known international *Pfizer Adverse Events*, including links where the court ordered Pfizer documents can be accessed.

Overall Adverse Events (pages 16-25); provides a summary review of cumulative cases in the first 3 months after the Covid-19 vaccine rollout:

- 158,893 adverse events resulted from 42,086 reported cases
- Of the 42,086 case reports:
 - 1,223 list DEATH as the outcome
 - 9,400 list UNKNOWN as the outcome (22% of the total 42,086 cases)
 - 11,361 list NOT RECOVERED at the time of the report (unknown final outcomes)
- Majority of Adverse Events include:
 - nervous system disorders (25,957), musculoskeletal/connective tissue disorders (17,283)
 - gastrointestinal disorders (14,096)
 - anaphylaxis, facial paralysis, COVID-19 infection, cardiovascular, dermatological, hematological, hepatic and autoimmune conditions
