To:

I am very disturbed that our government is working out a treaty with the World Health Organization (WHO) on a Global Pandemic. As I understand it, it would entrust our rights to this international body. This bureaucratic organization is a troubling experience for me to research and find out about this WHO pandemic treaty with the Government of Canada.

I can imagine the W.H.O. having an advisory role. However, ultimately, Canadians want transparency and accountability for decisions that will deeply affect our freedom and health.

Something that deeply affects our rights is being taken away from our elected officials and given to a questionable international body like the WHO. I strongly feel your constituency voted for you to retain Canadian control over an issue such as this.

At this point the Government of Canada is merely months away from ratifying this treaty. Yet, concerned Canadians such as I, are having to research this issue out. Sadly, high profile Canadians and international experts are speaking out against this treaty. They are providing excellent reasons why this treaty should not proceed.

Please reply to my email below and let me know what you will do about this matter that is of high interest.

Sincerely,
