Informed Consent Script

Confirm the name of person you speaking with/presenting this document to. (Write their name and job title on pages 1, 3 and 26 where Name and Date are required.)

Notice to Agent is Notice to Principle, Notice to Principle is Notice to Agent This statement means that this notice obliges you to share this letter and the contents of this package with every person above and below you in your chain of command within your workplace. It is also incumbent upon you to provide the information contained herein to any person requesting information from you on the topic of Covid-19 vaccinations, so that they may make informed health policy and/or personal medical decisions about Covid-19 mRNA therapy.

Do you understand the meaning of informed consent?

Informed consent is the act of agreeing to allow something to happen, or to do something, with a full understanding of all the relevant facts, including risks, and available alternatives. That full knowledge and understanding is the necessary factor in whether an individual can give informed consent. This type of consent applies to many situations in life, including making decisions about medical care and legal issues, as well as entering into contracts.

Consent is given only if that person has been informed of, and understands the facts of the situation, with a full comprehension of the risks and benefits of the decision, as well as an understanding of the possible alternatives, that any individual can consider whether an action would be in his best interests.

Obtaining of informed consent is especially important in the medical field, as failing to receive such approval leaves medical professionals liable for injuries that may occur.

Do you feel as though you have been fair and informative with patients, or otherwise, a customer, before injecting the Covid-19 vaccine into their body? (Wait for their reply, if they say yes, ask them what information they provided and ask them to cite their sources. If they say no, ask them why not, and "are you aware of the legal ramifications of not providing the necessary informed consent information?" {This document explains all of this in further detail.})

Have you explained risks with those in your care that have received the vaccine?

Are you aware of the ingredients in these Covid-19 vaccines?

We encourage you to carefully read through this information we call "Informed Consent". There are links to many trusted websites that contain vaccine injury reporting systems and data. The information within this legal documentation is factual and cannot be considered as misinformation!

It is your responsibility to inform your patients/customers of these countless injuries and adverse effects/deaths, that people have suffered.

This conversation has been videoed and will be kept on record for further evidence, have a good day.
