

Dear Honorable MP,

I'm very concerned that our government is currently in negotiations with the World Health Organization drafting a legally binding act of international law that equates to an international pandemic preparedness plan to "improve" the so-called prevention, preparedness, and pandemic response.

This act will give this unelected organization authority, under the guise of a pandemic scenario, to control the ability for Canadians to move freely, run our businesses, lock us down, and allocate our medical resources the way it sees fit, here in Canada and around the world. This centralized governance comes with the potential for serious consequences for Canadians.

As our elected government it would be negligent as well irresponsible on your part, to your constituents not to brooch this deliberate assault to our democracy, sovereignty, and our liberty, as a free country. We surely will lose our independence as a nation that is a major conflict of our best interests to the people of Canada.

At this point we are only three months away from when this will be on the table behind closed doors with absolutely no transparency from our government, this is criminal bordering on treasonous.

If you are unaware of this, you have just been brought up to speed that this is happening May 2024 and as an elected official, I sincerely expect you to take the initiative and address this very egregious act in the House of Commons and with other MPs, not only in your province but to share this information to all of Canada's MPs. I intreat you to stand up to this tyrannical overthrowing of Canadas national sovereignty.

As a citizen of Canada, I am baffled at the lack of mainstream media reporting and the lack of transparency regarding a deliberate takeover from the World Health Organization, an unelected NGO, over Canada's response on behalf of its citizens.

Canadians are watching, we are paying attention, and we demand accountability; there will be justice in this country. I implore you to do your job, take this to the mainstream media and demand public transparency regarding this WHO treaty.

Regards,
