Bio.

The Hamburg based band, IVYMIND, is a melting pot of folk, rock and improvised music, dancing between the lines of delicate song writing and boundless interplay seeped in expression. Their sound is greatly inspired by artists such as Paul Simon, The Beatles, Louis Cole and Paul Motian,

blending the natural, vocal-like sonorities of the clarinet with electric guitar, double bass and drums. An international, multigenerational combination of some of Europe's most eclectic and dynamic musicians.
